TRIBUTE TO OUR FOUNDER – GARY JOHNSTON

Gary Johnston, who passed away after a short illness on 10th March 2021, lived by the old adage that if you do what you love you'll never work a day in your life. That life began in an extremely modest house in the western suburbs of Sydney where he frequented the Concord tip to scavenge discarded parts from AWA and Phillips. As a teen he built amplifiers whose quality belied the origins of their construction. His passion for hobbyist electronics begun at an early age.

Working for Philips and CEMA brought him to the attention of a young Dick Smith. In 1975 Gary started working side by side with Dick and eventually rose to the role of Marketing Manager for Dick Smith Electronics. Upon selling DSE to Woolworths in 1980 it was Dick who left an advertisement on Gary's desk for a business that was for sale in the Sydney CBD, John Carr and Co. Gary bought that business in 1981, changed the name to Jaycar, and began to transform a single showroom into Jaycar Electronics. At the time of Gary's death in March 2021 the Jaycar Group included over 150 stores across Australia and New Zealand.

The success of Jaycar allowed Gary to indulge in a wide array of projects from racing his 1965 Valiant around the Australian Outback in several charity 'Variety Club Bashes', to buying an ex- Czechoslovakian Airforce Mig-21 fighter and more recently supporting Team Warby with David Warby's push to break the World water speed record currently held by his father Ken.

His most recent passion and perhaps his most significant was his creation of 'Submarines for Australia', an effort to lobby the Australian Government to scrap its planned $90billion+ project to acquire French Nuclear Submarines and retro fit them with diesel engines and to embrace nuclear power. In an amazing coincidence Gary's lobbying efforts were realised when on 16th September 2021, his birthday, it was announced that the Australian Government would purchase 8 Nuclear Submarines using top of the line US technology. Gary would have been proud beyond belief to have seen his efforts culminate in this announcement.

Gary is survived by his loving wife Kerry, children Chris, Tim, Jeni and Robbie and 6 grandchildren. We all miss him terribly but could not be more proud of the man who started life in a 2-bedroom cottage in Mortlake to rise to one of the most successful businessmen in Australia. A self-made man the likes of whom they don't make anymore.

The Johnston Family

HARDCORE ELECTRONICS

THE TEST OF TIME

Since the very first Jaycar catalogue in 1981, we have scoured the globe for the best tools and hardware for all sorts of electronics projects.

While our range has certainly evolved as technology has, there are some items which were great then, and they're great now.

CMOS ICs, PCB hardware, plugs and sockets, are just a handful of our products which have stood the test of time and have been ranged for 40yrs.

While we continue to look for innovations to bring you the latest products too, we thoroughly enjoy seeing these items which are in effect timeless. They're often still as versatile as they were 40yrs ago, even if the project you're building is very different.

LIQUID RESIN MAKES FOR MUCH HIGHER RESOLUTION 3D MODELS. THE LATEST IN 3D PRINTING TECHNOLOGY

ANYCUBIC Mono UV Photon Resin 3D Printer

Create highly detailed 3D prints with this Photon Mono resin printer by Anycubic. Unlike filament (FDM) type 3D printers, this resin printer uses UV light that passes through its high resolution LCD screen to cure the resin layer by layer where it is needed. This method produces a much more detailed and smooth print with less visible print layers. The Photon Mono features a 6" monochrome 2K LCD for detailed prints up to 130mm long by 80mm wide. The two high quality Z-axis rails provide build heights up to 165mm high with layer resolutions between 0.01 and 0.15mm. Thanks to the monochrome LCD, exposure times are reduced to just 1.5 seconds per layer so you can achieve print speeds up to 55mm per hour. The monochrome screen also provides up to 2000 hours of print time, which is four times longer than colour LCDs. To operate the printer, simply use the Anycubic slicer software to prepare and save the model to the supplied USB thumb drive, which you insert into the USB port on the printer. Use the 2.8" touchscreen to operate and monitor your printer's progress. The Anycubic slicer software supports up to 16 times anti-aliasing, with fast slicing, hallowing, split model, and text paste features.

Other features include quick FEP replacement, UV-blocking top cover, matrix parallel light for uniform exposure, and top cover detection that stops the printing if the cover is removed.

Resin in multiple colours is sold separately.

- 6" 2K Mono LCD

RESIN 3D PRINTERS CONTINUED

ANYCUBIC 4K Mono X UV Photon Resin 3D Printer

The 4K Mono X printer takes resin-based 3D printing to the next level. Using a 4K resolution 8.9" monochrome LCD this unit produces a higher quality, more detailed printed model with improved accuracy and in a faster print time than previous models. The larger size allows a larger build volume and bigger models.

Unlike filament (FDM) type 3D printers, this resin printer uses UV light that passes through its 4K high resolution LCD screen to cure the resin layer by layer where it is needed. Compared to FDM this method produces a more detailed and smooth print with less visible print layers.

The Photon Mono allows detailed prints up to 192mm long by 120mm wide. The two high quality Z-axis rails provide build heights up to 245mm high with layer resolutions between 0.01 and 0.15mm. Thanks to the monochrome LCD, exposure times are reduced to just 1.5 seconds per layer so you can achieve print speeds of up to 60mm per hour. The monochrome screen also provides up to 2000 hours of print time, which is four times longer than colour LCDs.

To operate the printer, simply use the Anycubic slicer software to prepare and save the model to the supplied USB thumb drive, which you insert into the USB port on the printer. Use the 3.5" touchscreen to operate and monitor your printer's progress.

The Anycubic slicer software supports up to 16 times anti-aliasing (smoothing), with fast slicing, hallowing, split model, and text paste features. The mobile app allows remote monitoring and management of print jobs

Other features include quick FEP replacement, UV-blocking top cover, matrix parallel light for uniform exposure, and top cover detection that stops the printing if the cover is removed.

3D PRINTING RESIN

RESIN FOR 3D PRINTERS

eSUN

ESUN 3D PRINTER RESIN

A range of resins from market leader eSun, made specifically for LCD/LED light source printers.

- **Optimised for both colour and mono printers**
- **Suitable for large and small printers**

eSUN Standard Resin 1kg

eSun-Standard Resin is a good general purpose resin with high hardness.
- High hardness & rigidity
- Good moulding accuracy
- Easy to print thin-walled part
- Smooth printing surface

eSUN PLA Resin 1kg

eSun-PLA is a Bio-Based PLA Resin designed to be cleaned with a resin wash.
- Low smell
- High precision
- Smooth surface
- Can be and drilled
- EN71-3 certified, safe for kids to use, making model toys, etc.

eSUN PLA Pro Resin 1kg

eSun-PLA is a Bio-Based PLA Resin which has excellent resolution, well suited to the production of props and models that require a higher level of detail.
- Higher resolution & precision
- High strength & toughness (balanced performance)
- EN71-3 certified, safe for kids to use, making model toys, etc.

Resin for ANYCUBIC 3D UV Resin Printers

Anycubic resins are designed to optimise the performance of low light source LCD based printers. This resin ensures maximum strength and minimal shrinkage as well as achieving fastest print speed. Shortened curing time adds to the performance enhancements brining premium print jobs to life in the shortest time. As well as fast and accurate printing this resin minimises release forces and adhesion so that the model attached to the forming platform can be easily removed. Low viscosity makes for easier cleaning of both printer and model.

HANDLING RESIN

When handling uncured resin, it's highly recommended to wear protective gloves. Our IPA (NA1066) can be used to clean uncured resin off your machine & desktop, but should never be used to clean skin.

DISPOSING OF WATER WASHABLE RESIN

After rinsing printed models with water, the water picks up particles of the resin. The safest way to dispose of this is to let the rinse water sit in a tray in the sun. The resin will solidify allowing the water to be filtered and the solids captured. Once captured they can be dispose of in the same way you would waste plastic.

Flashforge Adventurer 4 3D Printer with Air Filter

The Adventurer 4 offers a number of benefits. A larger size means larger builds and the optional 265°C nozzle means exotic filaments are no problem.

The levelling free platform minimises set-up time and the 110°C platform with magnetic build plate and double holder spring plate simplify the removal of models.

Resume printing after a power failure, HD camera and app based remote control enhance 24/7 management of your print jobs. The package is rounder out with a 1kg spool capacity and HEPA 13 filter.

This is a well-priced larger capacity unit.

- Multiple nozzle extruder options
- Quick-release nozzle design
- Filament detection
- Magnetic flexible build platform
- 4.3" touchscreen
- Resume printing
- Remote printing control by Wi-Fi or Ethernet.
- Supports ABS, PLA, PC, PETG, PLA-CF, PETG-CF materials.
- Cloud printing
- Built-in-camera
- HEPA13 air filter
- Energy-saving mode

Flashforge Guider IIS Extra Large 3D Printer

The Flashforge Guider IIs has an upgraded extruder which can be heated up to 300°, and a max print speed of 100mm/s. It gives you access to print with a wide varity of PLA, PVA and advanced filament such as PETG, TPU, ABS, Nylon, HIPS, PA, PC, wood, electrically conductive materials, flexible material. The Guider IIs' platform can print at a max dimension of 280 x 250 x 300mm 3D models, meaning you can print large whole 3d model or print multiple parts at the same time. The unit is enclosed in a sturdy 38kg full-metal frame which its design allows the print head to move steadily & quietly, ensuring consistent 3d printing every time. The bed auto-leveling system ensures the platform is level before the print. The extruder then adjusts the minor distance between the print nozzle and platform to create a uniform and smooth build surface, which highly improves the platform adhesion and print quality.

- 300°C patent extruder & 120°C heatable build bed
- Open filament system & filament detection
- Resumes printing from power failure
- 5" touchscreen
- Cloud printing
- Built-in camera
- Air filter

DOBOT Triple Filament 3D Printer MOOZ-3Z

The newly introduced modular colour-mixing 3D printer MOOZ-3Z features a delta structure and high printing efficiency. Equipped with a three-colour print head, you can easily create mixed colour printing artworks via the controller, by setting different feeding speed and printing time of the three differently-coloured raw filaments. Two schemes of colour-mixing in CMY colour mode are available to 3D print the desired colour pattern. Quick assembly, easy-to-use controller and app, rich printing colour pattern make MOOZ-3Z suitable for beginners, DIYers, educators and artists. It's time to say goodbye to monotonous single-colour printing and welcome more beautiful and colourful 3D printing models.

3-in 1-out Mix Colour Print Head
that Prints at Fast Speed and High Efficiency

Born for colour-mixing 3D printing, MOOZ-3Z shows super high efficiency and incredible fidelity. By using merely one 0.4mm nozzle, it provides you with very smooth and lifelike results. The 3-in-1 out mix colour print head not only gives a rich mixture of colour combination to the printed objects, but also brings forth high efficiency and ultra-fast printing speeds. Different colours will blend together perfectly so that you create multi-colour objects without encountering any trouble.

Snapmaker 3-in-1 Printer with 3D Printing/Laser Etching/ CNC Carving Interchanging Modules

The Snapmaker 3-in-1 3D Printer isn't just limited to 3D printing. The extruder nozzle can be swapped out with the included laser engraver or the CNC carver. With its integrated modular design and connectors, you can transform this printer with ease as well as expand it with future upgrades. The 3.5" touchscreen gives you added control of your printer. The all-metal design of this printer is durable and provides a solid frame.

3D Printing Print 3D models as precise as 50 microns in a 4.9 x 4.9 x 4.9" build area using 1.75mm ABS and PLA filaments. Print from the USB Type-A port using .obj and .stl file types. The print bed is heated.

Laser Engraving With a 4.9 x 4.9" work area, the laser is 200 mW with a wavelength of 405 nm and is Safety Class 3B. It works on wood, bamboo, leather, plastic, fabric, paper, non-transparent acrylic, and more. Please note that the laser cannot engrave on metal, glass, and other reflective surfaces. Upload supported file types, such as SVG, JPEG, and PNG, to the Snapmaker.

CNC Carving With a 3.175mm shank diameter running at up to 19,000 rpm, the CNC carving module has a 3.5 x 3.5 x 2.0" work area. It can work with wood, acrylic, PCB, carbon fibre sheets, jade, and more. Please note that metal, glass, and gem are not supported. SVG, STEP, IGES, IGS, DWG, DXF, and more are the supported file types. You may need to use a third-party application, like Autodesk Fusion 360.

3D PRINTING FILAMENT

pick me — FILAMENT GUIDE

Over these pages you can see that Jaycar sells an extensive range of 3D printer filaments from standard PLA to exotic filaments, including conductive, flexible and glow-in-the-dark. If you're wondering which filament to purchase, looking to fine-tune your printer, or just curious to find out what options are available have a look at the table below. Our in-house boffins have tested our filaments under all sorts of conditions to work out exactly what the best settings are for printing. We've listed recommended bed and nozzle temperatures, and other suggestions to get the best out of your filament.

	Extruder Temp	Bed Temp	Notes:
PLA	200°C to 220°C	0°C to 70°C	Most common type of filament which compatible with all types of 3D printers. Bio-degradable and FDA food safety approved.
ESILK	190°C to 220°C	0°C to 80°C	Prints like PLA, with a transparent & high gloss finish.
PETG	230°C to 250°C	0°C to 80°C	Easy to print, stronger than PLA with low shrinkage. Not as resistant to heat & chemicals compared to ABS.
ABS	220°C to 260°C	90°C to 110°C	Able to withstand heat and stress without cracking or weakening, finished prints will hide blemishes & minor print issues. ABS is highly resistant to chemicals, making it a great base for gluing, sanding & painting.

Tech talk — FILAMENT TYPES

Description Summary of filament types

PLA (Polylactic Acid): Commonly used filament. Odourless, low warp. Does not need heated bed. Environmentally friendly. Made from corn starch.

ABS (Acrylonitrile Butadiene Styrene): Very durable. Will withstand high temperatures. Needs heated bed. Can be finished (after printing) with Acetone to produce glossy finish.

PET (Polyethylene Terephthalate): A plastic commonly used in plastic bottles. Stronger and more flexible than ABS. High degree of successful printing outcomes.

Other filament types: These are usually combinations of the base plastics above loaded with fillers to give the filament individual properties, e.g. "wood" appearance, metallic, etc.

See page A18 for more details.

1.75MM ESUN FILAMENT

eSun are regarded as one of the leading manufacturers of high quality resin & 3D filament, known for producing smoother prints & better adhesion. We have partnered with eSun to expand our range of resin & filament colours and types, including some new exotics, to hopefully ensure we have the right filament for your next work of art.

PLA+

The all new eSUN PLA+ filaments are 100% bio-degradable and FDA food safety approved. PLA+ is 10 times stronger than regular PLA and has no wire-drawing problems, meaning the surface of the printouts will be smoother and more delicate. With a low material shrinkage rate giving a uniform diameter & no cracking or brittle issues.

3D PRINTING FILAMENT STORAGE

eSUN eBox Filament Storage Dry Box with Built-in Heater

The eSUN eBox Filament Storage Dry Box is the new filament storage box designed by eSUN. Its not just a storage box but actively heats up to keep the filament dry. With a maximum heating temperature of 80°C (heating panel temperature), eBox can also be used to create a completely dry environment for your filament and to actively dry out the moisture in some filaments. The eBox also integrates a weighing function which allows customers to weigh the filament left and check how much filament costs for each print.

• Filaments are rack placed
• Sealed protection, dust-free
• Space to add a silica gel pack
• Set the heater time and temperature
• Real-time filament weight detection
• Anti-skid rubber feet

Mini Auto Vacuum Pump with Bags

If you own a 3D printer, it is important to keep any unused filament dry to ensure a better build quality of your prints. Many filament types are hygroscopic which means they can draw in moisture from the air. Any moisture can lead to stringing, air bubbles, poor bed adhesion, etc. This mini vacuum pump provides an easy and affordable way to keep your printer filament dry. Simply insert your filament into one of the six bags provided, seal the bag, and then draw out the air by placing the pump over the bag's air valve and pressing the start/stop button. The bags can also be used to keep food fresher for longer. 4 x AA batteries required (not included). Supplied with 6 reusable bags (3pcs 30x34cm, 3pcs 26x34cm)

3D PRINTING EXOTIC FILAMENT

EXOTIC FILAMENT GUIDE

Our range of exotic filaments are sure to appeal to anyone interested in 3D printing. There's filament that makes your creation look like it's made from wood, glow-in-the-dark, flexible and colour changing filament when heat is applied, and more. Imagine the possibilities with the conductive filament! All of our exotic filaments are 1.75mm, supplied in 250g rolls, and are all suitable for our current and superseded 3D printers.

• 250g Roll

Note: Exotic filament not suitable for our 3D pen.

		Extruder Temp (°C)	Bed Temp (°C)	Notes:
	GLOW IN THE DARK	180°C to 240°C	20°C to 80°C	Glow-in-the-dark filament is a great product to decorate children's bedrooms, from glowing light switches to a starry sky on the ceiling. Your prints will shine brightest immediately after turning out the lights, but dim quickly to a soft glow in the night. Use your normal print settings for PLA, but add more perimeters to your prints. The more perimeters, the more glow. Glow-in-the-dark filament is available in PLA filament 1.75mm.
	TPE	210°C to 225°C	20°C to 55°C	TPE filament is a flexible 3D printing material that feels and acts much like flexible rubber. TPE filament can be used to make parts that can bend or must flex to fit their environment: stoppers, belts, springs, phone cases, and more. Due to its flexibility, much slower print speeds must be used to keep the filament from binding in the extruder- we print at 20% speed.
	WOOD	175°C to 250°C	30°C to 50°C	These wood-like 3D printer materials give 3D printed objects the look and feel of fibreboard. They imbue parts with other wood-like attributes, such as the ability be cut, painted, and sanded. These filaments use PLA as their base, and mix other materials (usually in powder form) into them. The PLA gives the 3D printer compatibility and ease of use while the material contributes to the look, feel, and properties of the filament. With these organic fills, be cautious of too high of a temperature, as it will result in the wood burning which will give you a darker coloured print. It is important to remove the filament from the extruder fairly soon after finishing a print, as the filament will begin to burn in the nozzle and start to clog it.
	METALLIC	195°C to 220°C	20°C to 50°C	These metals infused PLA filaments are tougher to print than Standard PLA filament, but because of the metal blended with the plastic, prints are heavier and thus, feel more authentic. Finished 3D prints can be sanded and polished to create beautiful and unique pieces. Unpolished, the filament looks like cast metal fresh from a mould, with a dull, matte, gritty appearance. With just a little finishing and polishing, however, you can easily create any look like you desire. 3D Printing with these metals is perfect for printing jewellery, props, costumes, figurines, and robots. These filaments are great not only for hobbyists looking to make faux metal prints, but serious designers as well.

3D PRINTING FILAMENT & MANAGEMENT

3D PRINTER EXOTIC FILAMENT CONTINUED

Conductive PLA

Bring your 3D printed projects to life with this electrically conductive PLA filament! Bulk resistivity is 0.6 ohms per cm3 - note that this is not the same as "grams per centimetre", but refers to the resistance of a 1cm cube across opposite sides with full contact. The filament itself measures about 4k ohms per metre, so it is mostly suitable for signal level voltages, but it is conceivable that you could illuminate some LEDs for example. The conductive properties come from graphene embedded in PLA which is biodegradable.

Note: Due to the additive in this filament it is very brittle and should be handled with care.

1.75mm PET

250g roll of 1.75mm PET filament for 3D printers. Recyclable PET is a stronger alternative to PLA and doesn't smell as bad as ABS when printing. There's four variants of PET available, red, blue, green and yellow, and they are all translucent, giving a stand-out look to your 3D prints.

RECYCLABLE PET

3D PRINTING BOOK

DIY 3D Printing Book

This book, compiled on 3D printing with Autodesk 123D, Tinkercad, and MakerBot reveals how to turn your innovative ideas into physical products that you can use or sell! Will guide you on how to operate powerful, free software from Autodesk and bring your creations to life with the MakerBot - a leading consumer printer - or an online service bureau. The included practical lessons take you through the Design, Catch, Meshmixer, Tinkercad, Make, and CNC Utility apps, and the MakerBot Desktop. Fun projects, easy-to-follow instructions, & clear screenshots progress from installing the software to printing the design. Videos & digital files accompany this hands-on guide.
• Make your own creations with Design and Tinkercad
• Download editable, premade content
• Generate construction documents with the Layout feature
• Create and edit a reality capture model with Catch
• Edit and mash up .stl files with Meshmixer
• Navigate the MakerBot Desktop
• Print the model on your own machine or with a service bureau

SOLDERING STATIONS - 240VAC

10W Soldering Station - 240VAC

Exceptionally delicate, temperature controlled soldering iron. With low pencil weight will help reduce fatigue on your hands when working for prolonged periods. Compact so you can almost keep it in your toolkit, and still have the precision you need on-site. The delicate pencil has enough power to work with fine components and circuits and good for very thin hookup style cable. Suitable for lead-based and lead-free solder thanks to the 100-450°C temperature range. Temperature is selected with the rotary dial, and the base unit includes an integrated stand.

• Integrated soldering pencil holder

48W Soldering Station - 240VAC

An ideal entry-level soldering station for the hobby user. This station comes with a lightweight iron with anti-slip grip and tip cleaning sponge, with temperature adjustment up to 450°C . It also has a 4mm banana socket connected to mains earth for soldering static-sensitive components.

65W ESD Safe Anti-Static Soldering Station with LED Display - 240VAC

Precision, Japanese manufactured instrument with excellent temperature stability and anti-static characteristics.

SOLDERING PENCIL:

Lightweight pencil features a grounded tip, ceramic heater, integrated temperature sensor and very supple silicone rubber grip. The temperature sensor provides precise tip-temperature information to the heater controller, which maintains the selected heat setting with a high degree of accuracy. The tip fits snugly over the heater element providing fast heat transfer and tip temperature recovery during heavy soldering.
- 0.5mm tip supplied

CONTROL UNIT:

Includes a digital temperature display unit, rotary temperature control, calibration control and display changeover switch to display either the desired or actual tip temperature. The darkened see-through cover prevents accidental temperature change but allows for easy access when required.

Thermaltronics Curie Heat Technology Soldering Station - 240VAC 55W Rated

It uses a proven technology, Curie point temp sensing with a new twist. The tip is heated by RF induction to bring the tip up to operating temp. The soldering iron tip is the heater. Older Curie point soldering irons like the famous Weller W-TCP used a separate Curie-switch, heater and tip. There are thermocouples, varistors or other temp sensors that only complicate things on inferior irons. The thermal inertia with the Thermaltronics product is far lower. The system consists of the base power unit which connects to mains 240V. The soldering pencil accepts a cartridge tip (which is also the heating element) and a burn-proof silicon rubber cord. The third element in the system is the pencil iron stand. This stand features a 'dry'-type tip cleaner which is made from machine curled brass and also a standard sulphide free tip sponge.

- Tips can be hot swapped
- Constant tip temperature
- Low power idle
- Under 10 second heat-up
- Rapid recovery from soldering load
- No overshoot
- No calibration needed
- ESD rated
- Can work leaded and unleaded solder

CONCLUSION

This is a very exciting development in soldering technology. We are sure that you will be delighted with this product.

Note: Not stocked at all stores but can be ordered.

† All tips are 350-398°C .

ESD Safe Solder/Desolder Rework Station

Complete solder/desolder station for professional and hobbyist use. Designed for soldering and desoldering all types of surface mounted IC, PCB, or components, and features an innovative heater and sensor that provides a quick heat-up and rapid temperature recovery. The unit will immediately enter into Working Mode when you pick up the handle, and return to Standby Mode when you put the handle back into the holder. The control unit has two LED displays with controls to the set temperature and the actual tip or nozzle temperature in Celsius and Fahrenheit. The temperature is easily adjusted in 1° increments with simple up/down buttons and the soldering/rework functions can be operated independently of each other. ESD safe. The heat gun can be calibrated from 3L/min to 24L/min and is supplied with 3 extra heat-gun attachments for different size components and jobs. Spare soldering iron tips are available separately.

This high quality soldering iron is made in Japan by goot®. This soldering iron offers exceptional heat recovery. The ceramic heater is automatically controlled by the heating load of the tip. With its high insulation and low current leakage, soldering of precision flat ICs and CMOS is safe. The heater on/off control uses a zero-volt switch circuit which reduces electrical noise.
• Tip temperature is set at 320°C
• The power lead is made from silicone rubber - very flexible
• The handle incorporates a ribbed rubber piece for extra grip
• Electricity Safety Approval Number SAITE20185

RECHARGEABLE SOLDERING IRON

Rechargeable Lithium-Ion Soldering Iron Set with Case

Everything you need to solder without the need for mains power or butane gas. Power is provided by an internal Li-ion battery for up to 50 minutes of soldering from a full charge. A quick 5 minute charge can provide 90 seconds of use if the battery isn't charged when you go to use it. An integrated LED provides light to what you are soldering, and safety features include overcharge, over discharge, and short circuit protection. The kit comes complete in a handy carry case with one 12W soldering tip (500°C), one 30W soldering tip (600°C), hot knife, sponge, and solder. To charge, simply plug it into an available USB power source. ESD safe.

- 30W/12W Tips
- Rechargeable Li-ion Battery
- Up to 50 Minutes Continuous Use from a Full Charge
- Regain 90 Seconds Use from a 5 Minute Charge
- LED Light for Illumination
- Hot Knife
- ESD Safe

5V USB SOLDERING IRON

USB Powered 8W Soldering Iron

This handy little soldering iron will work anywhere you have USB power, which let's face it, is basically everywhere these days. Even if it's from a laptop or power bank, USB power is almost easier to come by than mains power when away from the home or office, or in the workshop or shed. Unlike a conventional mains iron which heats up persistently, this one has a touch-switch to activate, and it rapidly heats to 380-400°C in just 15 seconds, and you're ready to solder. The heating element is rated at 8W, so it's useful for fine electronics and small jobs not sinking a lot of heat (such as thick cables, better left for appropriate soldering irons). The heating element is integrated into the soldering tip, so heating and cooling is very rapid. Includes a long life tip, protective cap, and USB power cable.

Note - at 8W, your USB port will need to be rated with at least 2A, which most newer charging ports are equipped to supply. Older USB ports may struggle to power this device.

- Heats up in under 15 seconds
- Long-life tip with protective cap
- Automatic shutoff
- Cools down in under 30 seconds
- 2 in 1 heating element and soldering tip

BATTERY POWERED SOLDERING IRON

6W Soldering Iron - Battery Powered

We have been surprised by the popular acceptance of this product, considering its modest power rating. Don't expect too much, but it will re-solder a dry joint or fix a solder lug, etc. It is ideal in potentially explosive situations, such as a bilge, or where petrol fumes may be present. Reaches full temp in about 10 seconds.

- Uses 3 x AA batteries (not included)
- Safety cover that locks the switch to ,"Off" so it won't discharge inside your tool box

GAS SOLDERING IRONS

PORTASOL GAS SOLDERING IRONS

Portasol® Technic Gas Soldering Iron

The Portasol® Technic combines compact power, and convenient reliability, making it one of the most versatile gas soldering irons available. It offers a run time of around 60 minutes, and tip temperature is adjustable up to 450°C . With equivalent electrical power of between 10 and 60 Watts, it is ready to tackle just about anything. The protective end cap features a built in flint type igniter, and if the gas is left on, it will turn it off when replaced. If a compact, versatile and reliable gas iron is what you're after, then the Portasol® Technic is for you.

Includes Tip Cover.

Portasol® Pro Piezo Gas Soldering Iron

The Portasol® Pro Piezo is a powerful gas soldering iron featuring an adjustable temperature control allowing soldering tip temperatures up to 580°C . With equivalent electrical power of between 15 and 75 Watts, there is little that's not possible with this beauty. It incorporates a viewing window at the end of the gas tank, to keep an eye on the fuel level. The fuel tank fills in around 20 seconds, and will provide approximately 45 minutes of run time. Ignition is via the built in Piezo crystal mechanism, and the end cap provides safety gas shut off when replaced. The Portasol® Pro Piezo is a dream to use, and will not let you down.

• 2.4mm double flat tip supplied

Includes Tip Cover.

Portasol® Super Pro Gas Soldering Iron

The Portasol® Super Pro is the big brother of all irons in the range. It features adjustable tip temperature up to 580°C , with equivalent electrical power of between 25 and 125W! 125W may seem somewhat excessive to some. You don't need a V8 to drive around town, but it's nice to know that the power is there when it's needed isn't it? Ignition is achieved with the internal Piezo crystal mechanism, and run time is around 2 hours on a 30 second refill. The stainless steel finished gas tank features a viewing window to keep an eye on fuel level, & the protective end cap also acts as a safety cut off for the gas valve control when replaced. With the various tips available & huge power at hand, no job is a match for the Portasol® Super Pro.

A leading brand recognised worldwide. Portasol® products are designed and manufactured in Ireland, to the highest quality standards. Since commencing operation in 1983, they have forged their way into the market with some of the most rugged & reliable gas powered soldering & heating tools in the world. They utilize catalytic combustion (flame tips excluded), which converts the gas flame into infrared radiation. It is a safe, flameless way of heating the tips evenly and continuously. They all use standard butane gas, and have a variety of tips available to support a wide range of applications.

Tech talk

CHEAP & NASTY BUT EFFECTIVE FLUX

Before solder wire had a core of flux in it you had to use a paste, or a liquid flux. The liquid was Zinc Chloride. It was made by getting some hydrochloric Acid (Muriatic Acid) and dropping zinc into it. The most common source of zinc was bits of galvanised iron. When you dropped the zinc into the acid bubbles would come off. When the bubbles stopped, the zinc had replaced the Hydrogen in the acid. The Hydrochloric acid was then called "killed spirits." The killed spirits was a great flux to solder together, say, brass or copper – or even galvanised iron. Of course, this was potentially dangerous but that was what you did in the good old days!
P.S. don't forget to wear safety goggles if you attempt this.

SILVER SOLDER

"Silver" Solder

Far, far stronger than tin/lead solder. The product is basically pure tin with around 4% silver. It contains no lead or cadmium. It melts at 221°C so could be actually soldered with a very hot soldering iron but best results are with a butane type blowtorch. Includes an adequate amount of liquid flux which is basically zinc chloride, water, ammonia and other chlorides. The flux is an eye irritant so safety goggles should be worn.

SOLDER PASTE

Classic Solder Paste - 15g SMD Syringe

Ideal for surface mount work and rework, solder paste provides a quick and easy soldering solution. Supplied in a syringe for easy application, simply apply it to the soldering pads, put your components in place and heat it with your soldering iron. Solder paste can go off in storage: we've found a local supplier so you can always be confident that the paste you get will be fresh. 63% tin 37% lead. Solder paste is best kept cool for long life and should be kept refrigerated. Please ask sales staff for this product, as it will be kept in refrigerated storage, not on display.

SERVICE CHEMICALS & INSULATION TAPES

Electronic Circuit Board Cleaner

Non CFC ozone safe propellant. It may not be obvious, but many circuit problems occur when flux and other contaminents (even finger prints) remain on the PCB causing 'leakage' between tracks. If you work with RF, high impedance (i.e. FET Op-Amps etc), ioniser or other circuits, PCB cleanliness is a MUST. This is a spray that dissolves flux residues & grime leaving the track work and board absolutely clean. We then recommend that you 'tropicalise' the board with circuit board lacquer (NA1002).

Tech talk

GOD-LIKE SPRAY CAN BEHAVIOUR

Many people will not go anywhere without a can of WD40. It is a great product and you will find it on this page. It is not the only God-in-a-can product that we stock, however. We also carry a similar product to WD40 called WD Lube (also on this page). (WD means water displacement).WD-40 is a light hydrocarbon oil with penetration properties useful for moving seized parts. It also works as a rust preventer by leaving a thin layer of oil on steel. WD-40 earned its reputation as a moisture displacer in the days when cars would not start due to condensation under the distributer cap. A further refinement is a product called INOX MX3. It does not contain petroleum or silicone based products and is indeed non-poisonous (the other products are not strictly poisonous, just obnoxious to taste) so much so that you can spray INOX near food. All God-in-a-can products have come a long way from their original automotive use. They have great anti-corrosion and lubrication properties, for example. They continue to find applications all over the place, but with modern ignition systems you can probably safely leave home without a can.

Bondic Liquid Plastic Welding Kit with Case and UV-LED light for Hardening

How many times has glue let us down? Fingers stuck together, broken toys that we just can't fix, having to throw out our stuff because gluing it only made it worse. Not to mention just when we need glue most we discover our 3-month-old bottle is as dry as the Sahara Desert on a hot day. Bondic® is the only product that works where glue fails. It's liquid plastic that only hardens when you need it to. YES it stays liquid and won't dry out like those crazy glues on the market today. Bondic® is a very simple 4-step process (clean, fill, cure and shape) to fix almost anything, saving countless precious items from ending up in the trash before their time. This incredible adhesive is a 100% waterproof and heat resistant tool. A solvent free formula stays liquid until cured with the included UV LED Light. The Bondic® solution dries clear and creates a permanent bond. Bond, build, fix and fill virtually anything in seconds. Bondic® works on: plastic, wood, metal, PVC, steel, wiring, ceramic, figurines, vinyl, Kevlar, polypropylene, leather and so much more.

WHEN STAINLESS STEEL IS NOT THE BEST!

We are big fans of stainless steel. We love it in tools, fasteners & many building products. It is not, however, always the best material. Top chefs will tell you, for example, that the best knives are not stainless, they are made out of carbon steel.

Why? Carbon steel is far harder & tougher than stainless. The problem, of course, is that carbon steel will rust if not maintained.

In our search for the best hand-tools, we have decided to stock two very high quality Japanese-made products made out of carbon-steel. They are not cheap but they are for the professional user whose time is money.

Like carbon steel knives, rust is not a problem if used constantly.

They will, however, pay you back every day because they will stand up to heavy wear & tear.

For those who have only occasional use for hand tools, we sincerely recommend stainless steel products.

Are you in the trade?

For professionals engaged in electronics & construction-related industries.

PLIERS, CUTTERS & TWEEZERS

PLIERS & CUTTERS

155mm (6") Side Cutters - Insulated

This drop forged alloy tool is made to the same standards as our TH1984 combination pliers. It is just as tough and will also cut piano wire up to 1.6mm. This is a quality tool and designed for dedicated wire cutting.
It has comfortable double inset handles.
• 155mm / 6" long

SPECIALTY PLIERS

180mm (7") - Screw Removing Pliers

This tool is basically designed to remove, by brute force, a hopelessly stripped out head of any type of small non-countersunk screw. The secret is an oval-shaped serrated hole in the end of the plier. You place the plier over the head of the screw, grip and rotate the plier. This system applies a lot more torque to the head of the screw than a drill bit ever could. It's reminiscent of the plier that a dentist used to extract your tooth!! Its Japanese manufacturer has provided a beautifully made and finished product. Suitable for any screw in the range of 2.0 to 5.0mm or so, although it will work on larger screws to lesser effect
• 180mm long

F-Type / BNC Insertion & Extraction Tool

If you've ever tried to unscrew an F-Type or BNC connector that's been in-place for a while, you know it can be really tough. Sure a spanner might help, but access is usually an issue too. This tool is specifically designed to allow you to insert them with firm torque for a quality connection, and a solid grip to unscrew the most stubborn plug too. Suits F-Type and BNC connectors.

Ideal for the back of a cramped equipment cabinet.

Sheet Metal Bender - Pan Break Style (Vice Break)

This unit sits in the jaws of your bench vice (100mm+ recommended). It retains itself in the vice with strong recessed magnets. One half consists of the familiar blade that bends the sheet metal. The other half in the 90 degree recess that the blade pushes into. By carefully positioning the sheet, you can perform a perfect 90 degree bend as good as a workshop! The blade is segmented, just like a workshop pan break, so that you can make partial bends. With a little practice, you will be able to fabricate brackets, small boxes & other metal assemblies like a pro. Warning: This unit is not particularly cheap. It is, however, very well made. It is cast steel with tool steel pressing components. You need it to be sturdy, otherwise it would break or flex. It will, literally, last a lifetime. Will fold sheet up to 125mm, however there are 3 x press segments 2 x 50mm, 1x25mm and these are independently removable by Allen head set screws. Depending on the width of the material you could easily bend steel strips up to 4mm thick and 25mm wide. Aluminium should not be a problem up to 4mm thick & 100mm wide, depending on your vice.

FISH TAPE

Wire Draw Fish Tape

A fish tape is a tool that's used to draw wire and cable through wall cavities or conduit. Instead of a clumsy method of using, say a length of fencing wire and hours of frustration, this handy tool uses 15m of flat, rigid spring steel with a built-in cable eye on the end to making running cables easy. You can easily direct the rigid wire exactly where you need to, and when not in use the tape rolls back up into its own case for easy storage. No electrician, data cable, antenna, home theatre or security installer should be without one.

- Made with Flexible High-Strength Steel in Durable Plastic
- Rust and Corrosion Resistant
- No Kink Design
- Length: 15m

Electrical safety warning:
Conduits, wall, floor and roof cavities contain live electrical wiring. DO NOT use this device anywhere around live electrical wiring. Ensure all electrical power is turned off and disconnected from the mains before use.

Deburring Tool Suitable for Pipes

Before   After

This drill-mounted tool fits in the chuck of an electric drill.

It is designed to almost instantly produce a burr-free threaded end to a bolt or threaded rod that has been hacksawed, guillotined, etc. It covers threaded bolts or rods from about 6.0 to 18.0mm diameter. It will also chamfer, say, a round bar or ½" diameter piece of concrete reinforcing bar. It works on mild steel, brass, stainless steel (only works marginally well on stainless steel) etc. This will increase productivity on a building site but is also ideal for the home handy man.

Dimensions: 52(L) x 28(Dia.)mm.

Works well on mild steel, reobar, brass etc. Not so good on stainless steel.

Tech talk

ALLEN KEYS FOR CORDLESS DRILL USE

Allen keys are very common these days and small sets like the one above are really quite inexpensive. The boss here has a set where he has cut off the short return piece of the Allen key with an angle grinder. The Hex bit then fits conveniently into the chuck of the cordless drill. The low speed setting on a typical "cordless" is generally more than enough torque for most jobs. It's a great way to assemble flat-pack furniture & saves wear & tear on your fingers.

SPECIALTY REPAIR TOOLS & MAGNIFIERS

WATCH REPAIR TOOLS:

Jaycar has been fiddling with micro tools for years now, from tiny jewellers screwdrivers to small spanner sets to tiny table mounted vices etc. We have discovered a source of reasonably priced watchmakers' tools (real; pull-watches-apart-tools.) Here they are, folks. We expect them to be popular; they are Jaycar kind of products.

2 Piece Watch Case Opener Set

This set consists of an adjustable opener that engages the little recesses on the back of a watch. You can adjust the removing lugs very accurately to get a tight fit - absolutely essential. The other half of the set looks like a small oyster shucking knife (Appropriate when you think about it!). It is just fine enough to get into that tiny groove that some of the older watch covers have.
• Can open cases 6 - 50mm diameter

Wrist Watch Strap Spring Bar Assortment

This is a must. A selection of the little spring bars that get broken/bent/lost even by the most careful wearers. This set frees you from the tyranny of the watchmaker. One use will pay for the cost of the whole set. The assortment consists of a total of 360pcs of the most common sizes: from women's 8mm to men's 25mm. All 1.5mm Dia. In detail the set includes 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24 & 25mm types. Has single sided spring bar and double sided types. Supplied in quality compartment case.

16 Bin Tabletop Storage Organiser

A simple way to keep your desktop free from component clutter and mess. The benchtop stand provides support for 12 small storage bins, and 4 large storage bins to hold your components, spare parts, small tools, or whatever you like! There is also a fantastic magnetic strip along the top of the frame, perfect for storing all your steel hand tools such as screwdrivers and spanners, or even just loose screws, bolts, nuts and other easily lost metal parts! Some basic assembly is required.
• Magnetic strip for tools
• Plenty of storage
• No fuss setup

PARTS CABINETS

6 Bin Parts Rack Cabinets
SMALL

Similar to our large parts rack, this unit is designed to house smaller items such as ICs, nuts, screws etc.
- Trays measure 60(W) x 65(H) x 45(D)mm each and also tilt down to 45 degrees
- Can be wall mounted & multiple units can be used for larger storage requirements
- Overall dimensions: 400(W) x 75(H) x 60(D)mm

HB6317

LARGE

This handy parts rack holds a variety of components in neat, see through trays that tilt down to an angle of 45 degrees for easy access.
- Each has an integrated label holder and measures 85(W) x 95(H) x 65(D) mm
- The rack can be wall mounted and multiple units can be nested together for larger storage requirements
- Dimensions: 600(W) x 110(H) x 90(D)mm

USB Mini Inspection Camera with 1.5m Flexible Cable

Inspect areas your head or hands simply can't fit into and your limited humans eyes can't see. Ideal for finding dropped screws/bolts, seeing inside car engine bays, checking inside pipes, under grates, up rangehoods, in ceilings, and much more. This unit comes with three brilliant add-ons, a hook, a magnet, and a 45° mirror that can be attached to the end of the camera to help you retrieve those important bits. There are 4 white LEDs at the front of the camera that can have their brightness adjusted with a dial fused onto the cable. With the supplied software you can also capture video and images for playback at a later date. Requires no batteries, just connect to your laptop and start viewing.

DIGITAL MULTIMETERS

HARDCORE ELECTRONICS

DIGITAL MULTIMETERS:

A multimeter digital or analogue, but mainly digital these days, is without a doubt your most trusted and widely used piece of test equipment. Indeed, it may only be your ONLY piece of test gear and certainly should be your first investment in test gear.

Most of our range of multimeters carry a LIFETIME GUARANTEE. Not even many of the ridiculously expensive Euro or US made products have a lifetime guarantee, so why pay 2-3 times as much for the similar-performing meter when you don't have to?

We sell more multimeters in Australia and New Zealand than anyone else.

The reason for this, of course, is:
• We are trusted
• We stand by our products 7 days a week
• We deliver the best quality for the price
• We have a great range
• And we are going to reveal to you our BIG SECRET

What's the secret? It is this. We don't carry spare parts for our meters!

Why? They are so reliable, they hardly ever break.

If, in the unlikely event you had a faulty meter, we would simply give you a new one.

DIGITAL MULTIMETER SELECTION GUIDE

We've colour coded the quick selection guide below to make it easier for you to pick the meter that best fits your needs. If you are a hobbyist and just starting out, look at any of the Green labelled products. They are both budget friendly and not overly complicated to use. For someone who has used a multimeter before and is looking for broader measurement, the Blue mid- range ones are for you. If you use your multimeter every day for work, then the orange Professional colour range is for you. These meters have all the bells and whistles and the highest ratings out of any of the multimeters we carry.

Cat III True RMS Autoranging 4000 Count DMM with Temperature & Non-Contact AC Voltage Detection

A powerful true RMS multimeter that includes non-contact voltage testing, backlit LCD, and a carrying pouch. The rear of the unit has a foldout stand so you can sit the meter at a comfortable viewing angle on your desk, workbench or car. Powered by 1 × 9V battery (included).

- Backlit LCD
- Leads & K-type thermocouple included
- Automatic (-) Negative Polarity Indication
- Data Hold
- 30 Min Auto Power Off
- Carry/Storage Case For DMM & Leads

IP67 True RMS Autoranging Cat IV DMM

This is an excellent true RMS multimeter that features a large, easily read display and carries an IP67 environmental rating. This means the multimeter is waterproof and will not be damaged if accidentally dropped into water or left out in the rain. The meter has data hold and relative measurement capabilities and is housed in a robust, double moulded case. Includes leads, soft carry case and user manual. Double moulded case.

ANALOGUE MULTIMETER

Analogue Multimeter

Digital multimeters have almost completely taken over, but there are those who prefer to use the old analogue meter - it's perhaps still the best way to test a capacitor. This well-made meter has audible continuity and a transistor leakage test, in addition to the normal set of functions. Have a closer look at this meter. It's a beauty.

- Holster Included
- Audible Continuity
- 20KΩ/Volt
- Mirror backed scale to cancel paralax error

SPECIALITY METERS

Multifunction Environment Meter with DMM

A multi-function environment meter that combines the functions of a sound level meter, light meter, humidity meter and temperature meter. Typical sound applications include checking acoustics of recording studios, auditoriums and professional hi-fi installations. The light and humidity meters are ideal for video photographers, greenhouse and hydroponic setups, etc. Others who should find this meter essential include interior designers, factory and office managers, record and archive keepers, schools, hospitals, laboratories and, of course, universities.

- Sound Level Meter
- Light Level Meter
- Indoor Temperature & Humidity Measurement
- Non Contact Voltage

DMM with Network Cable Tester

This innovative device is ideal for network installers or technicians & will allow the user to easily check cable integrity or measure AC & DC voltage, current, resistance, & continuity etc. without needing to carry two separate devices. The unit will check for cable continuity, opencircuits, short-circuits, & cross-connects etc. A remote terminator is included and enables the user to check network cables at a wall jack or patch panel. Supplied with loop back cable, LAN terminator & multimeter leads.

USB OSCILLOSCOPE
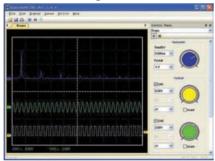

20MHz USB Oscilloscope

This unit does away with more of the hardware and provides a highly accurate interface to allow software to provide the display. It still provides 20MHz bandwidth and high accuracy and physical probe couplings, but takes up a fraction of the bench-space. Use the included software to provide just about all standard oscilloscope functions, and even output waveforms to excel/word files. Convenient function in a small form factor, ideal for the traveling or compact workbench.

• USB interface plug & play
• Automatic setup
• Waveforms can be exported as Excel/Word files
• Spectrum analyser (FFT)
• Cursor measurements

OSCILLOSCOPE PROBE

Oscilloscope Probe - 10:1 / 1:1

Passive high impedance oscilloscope probe designed and calibrated for use with instruments having an input impedance of 1MΩ shunted by 20pF. It may be compensated for use with instruments having an input capacitance of 15 to 35pF. The probe incorporates a three-position slide switch in the head, which selects attenuation of x1, x10 or a ground reference position.

This probe suits all of the oscilloscopes in our range. Supplied with sprung hook, channel identifier clip, ground lead, insulating tip, IC tip and adjusting tool.

POSITION REF
Probe tip grounded via 9M-Ω resistor, oscilloscope input grounded.

BENCH VOLTMETER

Analogue Bench Voltmeter 0-15V

A handy bench voltmeter with analogue dial and banana plug connections. Reminiscent of the voltmeters you might see in a school physics lab, this voltmeter gives a quick and easy to read display of volts, and is ideal as a permanent fixture on a test bench, with a 15V maximum reading be suitable for automotive part testing.
- Choose either 3V or 15V scales via separate banana plugs
- 3V scale reads -1V to 3V
- 15V scale reads -5V to 15V
- Zero offset adjust
- Analogue movement
- Internal resistance:
  3kΩ (3V scale)
  12kΩ (15V scale)

How to Test Almost Everything Electronic

Electronics is a unique science - everything that's going on has to be deduced from visible symptoms and effects with very little that is actually physically observable. The book covers everything from setting up a test and work area to using the most important types of test equipment - multimeters, oscilloscopes, signal generators, signal tracers, capacitance meters and frequency counters. It also covers testing and measurement methods, fault finding without circuit diagrams, component testing and some highly specialised measurement in applications such as audio and TV. A comprehensive volume that should be on every technical bookshelf.

TEST & JUMPER LEADS

Parrot™ Clip Leads

The Parrot™ Clip is the only test probe that provides both clip-on hands free contact as with an EZ-hook and normal point contact like a test probe. These feature a sprung hook, which is soldered directly to the lead and housed inside a round metal tube. The grip is performed between the 2 metal parts, which can be used as pincers if required. Probes are supplied with 1m leads terminated to banana plugs and are fully insulated to 1000V.

Professional Cat IV Multimeter Probes

Professional multimeter test probes have always been an expensive choice so what we've done is work closely with a manufacturer to get great quality probes at a genuinely affordable price! To start with, we've made them extra long; they're 1200mm long so you don't drag your meter across your workbench as you move around a circuit and makes them perfect for bench top meters. They're Cat IV rated for safety, feature finger guards and can handle 20A of current. The best part is the actual probes themselves. To start with, the probes are suitable for inserting into a standard 4mm banana socket using the same spring hold system. Also included are probe covers which not only stop the sharp points being dangerous, they allow only just the tip to be exposed for delicate work where you can be in danger of making a short between two connections which are close together. Probes suitable for inserting (and holding) in 4mm banana sockets. Probe safety cover with slot for delicate work. Comfortable and ergonomic grip.

TEMPERATURE MEASUREMENT

NON-CONTACT THERMOMETERS

Economy
Non-Contact Thermometer
A safe way to measure temperatures in hard to reach places, and hot or hazardous areas. It is compact and easy to use - simply aim the built-in laser at the target area and read the temperature between -50°C to 500°C from the backlit LCD screen. Features include a 12:1 distance to spot ratio, rapid 500ms detection, max/min, data hold, and auto-power off functions.

• -50°C to 500°C
• Rapid detection function
• Built-in laser pointer
• 12:1 Distance to spot ratio
• Automatic data hold
• Max/min function

Pro High Temperature Non-Contact Thermometer with K-Type Probe Support and USB
A professional non-contact thermometer with dual laser pointers to provide fast, easy and accurate readings of most surface temperatures between -50°C to 1650°C! The impressive 30:1 distance to spot ratio measures smaller surface areas at greater distances, with a 1% accuracy and a rapid 150ms sampling time. Features include automatic data hold & trigger lock, min, max, difference, average temperature displays, high/low alarms, and digitally adjustable emissivity (0.1 to 1.0) for more accurate readings of different materials. Provision for a K-Type thermocouple (supplied) enables you to take direct measurements up to 1370°C, and a USB port lets you transmit the data with a PC for further analysis. Supplied with a tripod, K-type probe, USB cable and carry case.

• Rapid detection function
• Built-in dual laser pointer
• 30:1 Distance to spot ratio

Tech talk

DISTANCE TO SPOT RATIO EXPLAINED

Distance to spot ratio is the ratio of the distance of the Thermometer to the object being measured, and the diameter of the temperature measurement area. The larger the ratio number the better the resolution.

HANDHELD THERMOMETERS & THERMOCOUPLES

Digital Thermometer with K-Type Thermocouple

A handy pocket-size digital thermometer, suitable for the lab, workshop or in the field. It features an excellent measurement range from -50°C to 750°C and a hold function to lock the reading on the display.
• LCD
• Pocket Size
• Wide Temperature Range
• Thermocouples included
• Battery included

Probe K Type Thermocouple

This plug in thermocouple probe allows you to measure external temperature readings on DMMs. It will measure from below minus 50°C to above 250°C depending on the DMM it is used with.
• Suitable for gas and liquid, both with good accuracy of 0.75%.

Wire K Type Thermocouple with Twin Banana Plugs

Similar to our other thermocouples, this one is fitted with banana plug terminations but does not have a "probe" assembly. The thermocouple junction will measure over a wide range of temperature but this will depend on the DMM.
• Typical thermocouple measurement range from as low as -50°C to over 1200°C

USB TEMPERATURE / HUMIDITY DATALOGGERS

A must for anyone involved with food preparation, archiving or storage or applications where storage of environment information is important. These USB dataloggers log temperature and humidity readings and store them in internal memory for later download to a PC. The measurement interval is adjustable - you simply set up the recording parameters then download the data when you need it. The data is recorded at the prescribed intervals and will alert you if preset min/max levels are exceeded. Countless applications including greenhouses, museums, warehouses, container storage, photography, archives, food preparation etc.

Dual Display Digital Thermometer for Fridge Freezer with Dual Probes

This Dual display Fridge/Freezer Thermometer will help keep food fresh and accurately stored in all zones of the fridge or freezer. The bold LCD screen provides an instant reading in either Celsius or Fahrenheit, in two zones of the fridge/freezer. Simply place each suction cup probe in the required zone, and then place the reading screen in a handy location, for instant reading of your food storage temperature. The dual digital thermometer will let you set the maximum and minimum temperatures you require and sound an alarm when it deviates from the range. This clever fridge/freezer thermometer will take the guesswork out of storing your food at the correct temperature and give you peace of mind that your food is fresh and ready to eat.

Wireless In/Out LCD Thermometer

Keep an eye on the outdoor and indoor temperature with ease. This thermometer is comprised of two parts. An LCD display/receiver to keep inside and a wireless outdoor temperature sensor which transmits the outdoor temperature back to the display. Great for monitoring computer server rooms, wine cellars, effectiveness of housing insulation, or for simply wanting to know the differentiation in temperature.
• No need to expose the LCD to the elements

Wireless In/Out Thermometer/Hygrometer

An advanced thermometer/hygrometer capable of measuring indoor and outdoor temperature, as well as relative humidity. The large easy to read LCD acts as a receiver unit for a separate outdoor sensor unit. It will record maximum and minimum temperatures for quick referral and conveniently displays the time of day. Ideal for temperature or humidity sensitive environments such as museums, greenhouses, or to check if your home and office is too dry or moisture laden. The LCD receiver unit is capable of receiving information from up to 3 sensor units, which are available separately (Cat. XC0324).

Electronic LPG Gas Level Monitor

Gas leaks can be incredibly dangerous, even small ones. Run a quick check over your campervan, caravan or gas powered devices to make sure all outlets are safely sealed. Hold the power button for a few seconds and then place the detector near the suspected leak and visual/audible warnings will sound if the leak is bad, moderate or safe. Red (Hi), yellow (Lo), and green (safe) LEDs denote the severity of the leak.
- Measurement ranges: 0-10,000 ppm
- Power on: Press and hold for 3 seconds
- Auto power off: Approximately 3 minutes
- Sensor detects butane, propane, acetylene, and methane (natural gas)

Indications include:
Green: Power on with short beep / safe with no alarm
Yellow: Lo alarm with short beep >2000ppm (0.2%) of methane (natural gas) detected
Red: Hi alarm with long beep >4000ppm (0.4%) of methane (natural gas) detected

Professional Digital Light Meter

Light has an enormous impact on the atmosphere created in a room, office, foyer, retail shop, reception areas, or on film and photography. In some cases, a professionally lit servicescape may be the difference between business success and failure. Achieving the right amount of light is a fine art, and the help of a professional tool should be sought to ensure minimum lighting level standards are achieved. This professional light meter is brimming with features that should be part of every lighting technician's arsenal. It uses photopic spectral sensitivity which closely mimics the response of the human eye to changes in light. It is extremely accurate with a rapid response and can store min and max values for easy comparisons.
Measurement can be switched between LUX and FC (foot candles) and a data hold function is included for pausing the reading. All this is output to an easy to read backlit LCD. A carry plastic case with handle is included for easy and safe transportation.

Modern, Upright Style with Clear LCD Screen and Longrange Data Sender

Apart from the very clear (monochrome) upright LCD screen, this unit includes the same 5-in-1 weather sensor/transmitter as the XC0434 unit shown elsewhere. Older transmitters operate on the 433MHz ISM band, which is plagued by garage door opener transmitters. This unit works on the 917MHz band with a range of up to 150m and is not allocated to a lot of consumer-type equipment. This unit has basically the same features of the XC0434 (See that unit for details) but with a compact display and offers a saving over the colour console unit.

WEATHER STATIONS CONTINUED

7" Colour Touchscreen with 5-Way Longrange 917MHz Transmitter

The main improvement to this model over the previous unit is the outdoor weather sensor. This sensor does not use the 433MHz band, which is sometimes plagued by interference from garage door openers especially. This model will send weather data to the indoor console unit up to 150m away! It has an improved rain gauge as well.

THE SENSOR
- Temperature / humidity
- Wind speed
- Wind direction (16 point)
- Rain gauge

Requires 3 x AA batteries

Large 7" Colour Display

THE CONSOLE DISPLAY
- Active display area measures 165 x 90mm
- Time, calendar, weekday and alarm
- Gust, or average wind speed (m/s, kmh)
- Real time and dominant wind direction
- Rain rate, daily/weekly/monthly (in or mm)
- Weather forecast (Sunny, slightly cloudy, cloudy, raining, stormy or snowy)
- Barometric pressure (relative or absolute)
- Histogram of rainfall or barometric data
- Much, much more

Wireless Digital Weather Station with Colourful LCD Display and Wi-Fi

Get your own local weather forecast with this professional Wi-Fi weather station. The feature-rich system is supplied with a wireless 5-in-1 outdoor sensor to measure rainfall, wind speed, wind direction, temperature, and humidity, as well as one high-precision hygro-thermo sensor to measure humidity and temperature from another place on your property. All sensors send data by a low power radio frequency signal (917MHz band) to the multi-colour main display unit up to 150m away (line of sight).

The backlit display can be desk or wall-mounted, and shows you the local forecast, high/lows, totals and averages for virtually all weather variables, without a PC. Connect it to your Wi-Fi network to be able to upload the weather data to wunderground.com and weathercloud.net, where you can access and upload your weather data freely. The time and date will be kept accurate as well, thanks to the internet time server.

With calibration and moon phase features, this system is truly a remarkably personal yet professional weather station for your own backyard.

Supplied with a USB power cable to power the main display from an available USB power source.

Digital Rain Gauge with Temperature

This Digital Rain Gauge with Temperature has a wireless self-emptying rain collector for measuring rain fall and temperature. The wireless rain collector sensor transmits data by using a low power radio frequency to the display main unit that can be located up to 150m away (line of sight). The display unit stores the data over a time range to allow you to monitor and analyse the weather status for past 24 hours. It has advance features such as the HI/LO Alert alarm to alert you while the set high or low weather criteria are met. It allows you to analyse hourly, daily, weekly, monthly and yearly rain fall records. With radio-controlled / atomic clock feature built-in, the system is truly a remarkable personal but professional rain gauge for your own backyard.

• Total Hourly, Daily, Weekly, Monthly and Yearly rainfall display
• Data logger stores and gathered data to display rainfall
• Graphical histogram display shows variation of rainfall pattern
• SINCE function to display TOTAL rainfall from a date
• Real time clock display with Atomic Radio Controlled function
• 150m sensor transmission range
• High / Low Alert function
• Alarm function with ice-alert function

Ultrasonic Water Tank Level Meter with Thermo Sensor

Keep an eye on your outdoor water tank from the comfort of your own living room, up to 100m away. Installed at the top of your water tank, the transmitter unit measures the water level and temperature using an ultrasonic sensor. You can hang the receiver unit on a wall (hooks) or pull out the stand and place it on your kitchen bench top, table or desk. View your room's temperature, tank temperature and water level (represented by a 10 element bar graph). You can store min/max records and set alarms for specific water levels (high/low) or when empty.

• Transmission range up to 100m
• Time display (12/24hr) / Time alarm mode
• Indoor temp. display / Tank temp display
• Tank level display (metre/feet)
• Tank level updated every 30 seconds or 3 mins
• Water level displayed on a 10 element bar graph
• Min. & Max. records for indoor & tank temp

IRRIGATION TIMER

Digital Irrigation Timer with 3 Individual Timers & Water Sensor

NEW

This unit is itself waterproof (IPx5), runs for ages on 2 x AA alkaline batteries, simply connects to any 3/4" garden tap. It is supplied with 1/2"; snap in hose adaptor as well. It has a clear LCD display and comes with a clear instruction book. It is ideal for gardens, shrubs, small lawns, patios etc. It probably is not big enough for large lawn/garden setups. A great feature is a prominently mounted rain sensor which shuts the unit off to save unnecessary watering if its raining. When it stops raining it resumes normal programming.

Specialist Universal LCD Battery Tester

Provides testing for most types of small rechargeable batteries, including a huge range of Lithium-based (LiFePo4, Li-Ion etc) batteries. You can test voltage, capacity, and internal resistance. Internal resistance is usually tied to the current charge level, however generally increases with a battery's age, it provides a good indication of battery health, most notably in Lithium-based rechargeable batteries. It also works with alkaline and various other non-rechargeable batteries.

• Tests over 11 types of batteries including cylindrical and button cells
• Test battery voltage, capacity (%), and internal resistance

OBD-II Engine Code Reader

Modern car engines are controlled by computers which regulate engine performance. Sensors are connected to major components which constantly send data to the computer which then adjusts performance accordingly to ensure minimal emissions and optimal performance. Reading data from these computers helps mechanics pinpoint where problems may lie in car performance. You can also find out this information with this OBD-II engine code reader. It connects to your OBD-II port and will immediately intepret the information in the ECU (engine control unit). You can use this information to find faulty sensors which adversely affect performance, see if cylinders are misfiring, see how hot your engine coolant is, view engine RPMs and much more. Diagnosing and fixing certain problems yourself can save a lot of time and money. It's also fascinating to see how much engine information is readily available in modern cars.

Viewable parameters*:
• Vehicle Speed
• RPM
• Fuel Consumption
• Engine Coolant Temp
• Fuel Pressure

* Not all measurements will be available in some cars

ODB-II Engine Code Reader/Diagnostic Tool with 2.4" LCD

NEW

A great way to accurately identify car problems and avoid unnecessary or costly maintenance. This handy diagnostic tool plugs into the OBD-II port of your car and displays the data from the engine system directly on the backlit 2.4" colour LCD screen. See engine performance real-time, quickly read and clear engine data trouble codes (DTC), turn off MIL light, perform an electrics cranking or charging test, check state emission monitor status, drive cycle verification, and much more. Works with most OBD-II compliant cars, mini vans, and light duty vehicles sold worldwide since 1996.

• Read & remove codes
• Reads live PCM data stream
• Views freeze frame data
• Easily determines the cause of the Malfunction Indicator Light (MIL)
• Turns off Malfunction Indicator Light (MIL), clears codes and resets monitors
• Displays DTC (Data Trouble Codes) definitions
• Retrieves generic (P0, P2, P3, and U0), manufacturer specific (P1, P3, and U1) codes, and pending codes
• Displays monitor and I/M readiness status (emissions)
• Retrieves vehicle information (VIN, CIN and CVN)
• Test the vehicle charging and cranking systems

Tyre Pressure Gauge with Deflation Monitoring

Keeping your tyre pressure in check is important for maximising the life of your expensive tyres. But if you're travelling on sand or muddy terrain, or 4WDing in general, you often want to reduce pressure in the tyres to maximise your overall footprint and stability. Sure, you can grab a stick and manually deflate the tyres, but who wants to do that! Use this gauge and it will show current pressure while it deflates, so you can stop at any time! Also helps prevent over-deflation of tyres! Also features a bright LCD and LED torch to help you see what you're doing.

SPECIALTY METERS

30m Laser Distance Meter with 5m Tape Measure

Use this 2-in-1 laser measuring tape to measure rooms or areas up to 30m* using the laser or objects up to 5m using the retractable tape. The display can be set to show metres, inches or feet, with a laser accuracy down to just +/-3mm in ideal lighting conditions. The internal rechargeable battery can be charged from an available USB power source, and power save features extend the battery life.

Up to 30 metres under good measuring conditions (good measuring surface, room temperature). Under bad measuring conditions (such as too strong ambient light, excessive or small measured coefficient of the measured point, excessive temperature difference, etc.) the deviation is ±0.25mm/m.

Please use a reflector in cases of strong sunlight or poor reflection of the target

Mini Laser Distance Meter - 20m

A laser distance meter makes light work of taking area measurements. No longer do you have to get a second pair of hands on the other end of a tape measure, while you find some eye-protection for the inevitable recoil when you're done! Providing measurements up to 20m, with an accuracy of just 1.5mm - that's probably less than the flex in the end-hook of a tape measure anyway! Resolution down to 1mm, it also provides the last 20 measurements. Works in metric or imperial measurements, and can even help you with your area and volume calculations! The weatherproof case helps you work in just about all conditions too.

STUD DETECTOR

3 in 1 Stud Detector with Laser Level

A stud detector that doesn't just "beep" when you're over the stud, it shows the proximity when you are NEAR a stud via the large LCD and shows a target graphic when you're spot on. Also includes live wire (voltage) detection, you can be sure that nail you're about to hammer into the wall won't end up in your mains wiring. The best feature of all is the built in laser level. Rotating across 180° with stops on 45° and 90°, you can instantly and easily do layouts and basic tasks such as picture levelling in a snap. The inbuilt spirit level ensures you're at the right angle.

- Laser levelling, layout and stud locating on vertical and horizontal surfaces
- Wood, metal and live wire detection
- 180° pivoting laser plane with level and plumb vials
- 20ft laser line projections onto work surface with 90° squaring
- Two self contained half pins to mount unit to work surface
- LCD sensing and mode display with target graphics
- LED display with continuous live wire detection
- Thumb dial adjustable feet for levelling the laser

Add On Board to suit QP5570

This add on board makes it easy to set the range and decimal point on our QP5570 panel meter. The ranges can be permanently set with a solder bridge or wired to a switch for selectable ranges.

Note:
- *Also suits previously sold QP5580 LED panel meter, but doesn't support 200mV range*
- *Cannot be used in applications where voltage to be measured also powers DPM*

3.5 Digit Jumbo LED Panel Meter

This is not just a digital display, but a fully functional high impedance digital panel meter that only requires power to operate. It will measure voltages from 200mV to 500VDC (jumper selectable) and has a maximum count of 1999. The module is suitable for a host of applications and can be used as a voltmeter or adapted for use as a current meter, thermometer etc. The decimal point location can be selected with a jumper and the module uses an easy "plug-in" fixing method. The meter shares a common ground with the voltage being measured.

Self-Powered LED Panel Meter 4.5-30VDC

Super simple to install, simply connect the power you want to monitor! Some panel meters require a power source in addition to a sensor wire to the source you want to monitor. The unit connects straight up, with no fuss! Suitable for use between 4.5V and 30VDC, it's suitable for many DC applications including cars, boats, caravans, and other 12-24V sources. However its wide measurement range means it can be applied to many other applications too! Red coloured display. Panel mount with self-retaining spring clips.

HEAVY DUTY CURRENT SHUNTS

Heavy Duty Current Shunts

Placed in series with a high power circuit, these shunt bars allow you to measure high current draw without needing a high current ammeter. Heavy duty brass construction and hand calibrated, they include large terminals for connection of the main circuit cables and smaller terminals for connection to a meter. Suitable for use with a standard multimeter or panel meter you simply measure the millivolts across the shunt to display the current draw of the circuit. Models are compatible with many readily available power meters.

NOTE: Care must be taken with digital panel meters and current shunts. Some meters allow their negative power input to be common with the measured supply. Others require completely isolated supplies. Check the datasheet carefully.

Tech talk

HOW TO INSTALL A CURRENT SHUNT
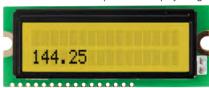

- **Voltmeter is on millivolt scale**
- **Voltmeter connections to shunt are on each side of shunt**
- **If current is DC observe polarity. If AC amps connect either way**
- **Specs of shunt generally stamped on the shunt itself ie. 50mV/50A (volt drop across shunt) equates to 5, 10, 20A max current, etc. i.e. A 25mV reading on the millivolt meter would equate to 25A current on a 50mV/50A shunt. You can read the current straight off the millivolt scale on the meter.**

LCD MODULES

LCD Panel 2 Line 16 Character Compact with Backlight & SIL Connections

This compact LCD module has 96 inbuilt ASCII characters as well as 92 special letters and 8 custom characters, which can be displayed on a 16 character by 2 line screen. It will hold the current input on the display using its own built in memory, making it easy to drive. Connections via single in line solder pads with an independent backlight.

ARDUINO® STARTER KIT

Arduino® Starter Kit

This offical kit from Arduino® includes all the essentials to get you started in the exciting world of Arduino®. The kit includes the Arduino® UNO board, which is one of the best boards to learn about first, along with a breadboard and plenty of prototyping accessories. Components include LEDs, resistors, switches, a potentiometer, a buzzer, a motor with fan, which can make any of the five projects described in the printed user manual, and for other projects you can find online. A generous amount of coloured jumper wires are also supplied. The kit makes the perfect gift for a young electronics enthusiast or maker in the making.

The Starter Kit includes:
- 1 x Projects Book (170 pages)
- 1 x Arduino® UNO
- 1 x USB cable
- 1 x Breadboard 400 points
- 70 x Solid core jumper wires
- 1 x Easy-to-assemble wooden base
- 1 x 9v battery snap
- 1 x Stranded jumper wires (black)
- 1 x Stranded jumper wires (red)
- 6 x Phototransistor
- 3 x Potentiometer 10kOhms

Duinotech MEGA Kit

This handy kit includes an Arduino® compatible MEGA development board, a breadboard, and an extensive range of components to make any number of exciting Arduino® related projects. The wide assortment of components has been carefully selected based on the most common Arduino® project you find online today. Input related components include switches, and sensors to detect light and temperature. Output related components include buzzers, relays, and displays. The displays include coloured LEDs, 7 segment displays, a 8x8 dot matrix, and an LCD screen. There is also an infrared remote control and receiver to make your own remote controlled projects. When not in use, the components can be safely stored away in the supplied storage organiser.

ARDUINO® SENSOR KIT

Arduino® Sensor Kit with 10 Sensors plus Shield

The Arduino® Sensor Kit is made for Makers who have just started using Arduino® to explore the vast space of electronics and programming. This kit teaches how to connect and program basic Grove modules that includes both sensors and actuators along with the Arduino® UNO. Grove is an open-source, modulated, and ready-to-use toolset and takes a building block approach to assemble electronics. This Kit includes a Base Shield to which the various Grove modules can be connected both individually, or together in various combinations to create fun and exciting projects. All of the modules use a Grove connector, which connects each of the components to a Base Shield in just a few seconds. The Base Shield can then be mounted on to an Arduino® UNO board and can be programmed using the Arduino® IDE. Instructions for connecting and programming the different modules are also included in this kit. This kit was elaborated in collaboration with Seeed Studio and provides the Arduino® community with the opportunity to build projects with minimal effort of both wiring and coding. This kit acts as a bridge to the world of Grove and provides a flexible way for Makers to extend their projects to include other complex Grove modules. The Kit comes includes access to an online platform with all the instructions required to plug, sketch and play with the different Grove Modules.

ARDUINO® COMPATIBLE BOARDS

Duinotech Classic (UNO R3)

The flagship of our duinotech family, the duinotech Classic is a 100% Arduino®-compatible development board. Its stackable design makes adding expansion shields a piece of cake. Powered from 7-12VDC or from your computer's USB port. In the past few years the Arduino® has taken the electronics world by storm. Everyone from hobbyists to professional engineers is making use of its limitless versatility. And it's not just for tech-heads; its easy to learn programming has made the Arduino® a hit with artists and educators as well.

ARDUINO® COMPATIBLE BOARDS

Duinotech ATtiny85 Micro USB Development Board

This tiny development board features an ATtiny85 8-bit microcontroller that you can program using the Arduino® IDE to make projects that don't need all the performance of larger development boards such as the Arduino® NANO or UNO. It has an onboard micro USB socket for programming and power, and 6 x I/O connections. Power can also be provided directly via 5V, or by using the integrated 5V voltage regulator from a 7-35VDC supply (12V or less recommended).

Duinotech NANO

This is the most breadboard friendly Arduino®-compatible device you will find. Despite its small size, it packs virtually all the features of the full duinotech boards into a tiny DIP-style board that drops directly into your breadboard. It uses exactly the same ATmega328 chip as its larger cousins, so there is no need to change any of your coding. A Mini-B-USB port is easily accessible on top of the board for programming and serial communication. LEDs show power and serial status and a reset button is easily accessible. Its small DIP-style makes it easy to embed into Veroboard or custom PCBs for more advanced projects.

Duinotech Lite (Leonardo R3)

Most of the duinotech models use two chipsets, one for the main controller, one for USB communication. The duinotech Lite combines both these functions into a single IC. This opens the door for more advanced USB functions. Now you can have your Duinotech Lite emulate a computer keyboard, mouse, joystick and many other types of input device. The duinotech Lite also boasts more analog inputs (12), and an extra PWM channel.

Duinotech Lilypad Plus

An all-in-one Arduino®-compatible board to add dazzling effects to your next project or costume. The round-shaped board features ten mini RGB LEDs, a motion sensor (accelerometer), temperature sensor (thermistor), light sensor (phototransistor), microphone, buzzer, left and right push-buttons, slide switch, and more to suit a wide variety of applications. The fourteen power and I/O pads around the edge of the board are alligator clip friendly for prototyping purposes, can be soldered, mounted with metal screws, or sewn into your costume using conductive thread (sold separately). The onboard ATmega32u4 8-bit AVR microcontroller runs your Arduino® code, and the eight I/O connections include Serial TX, Serial RX, I2C (SCL & SDA) and four GPIO pins. Program and power the board from USB or 3.3VDC.

A battery pack (6V max.) can also be connected to make your project completely portable. The USB port has HID support to act like a keyboard, mouse, joystick or MIDI, and the eight non-power related pads can be used as capacitive touch applications.

Duinotech Wearable ESP32 Development Board

With this compact yet powerful ESP32 wearable development board, you can take your costumes and wearable technology to the next level, including Smartphone control. The board has all the features of an ESP32 including Wi-Fi and Bluetooth®, but on a 56mm diameter board that can be sewn onto fabric or similar material using conductive thread (sold separately).

There is a provision to connect a rechargeable battery for portable applications, and programming is performed easily via the onboard micro USB port with the Arduino® IDE through the ESP32 add-on.

ARDUINO® COMPATIBLE BOARDS

ESP32 Main Board with Wi-Fi and Bluetooth®

The ESP32 is a powerful dual core microcontroller featuring Wi-Fi and Bluetooth®, and thanks to the efforts of the Arduino® community, is able to be programmed with the Arduino® IDE through the ESP32 addon. It has 512kB of RAM, 4MB of flash memory and heaps of IO pins with features like 12 bit ADC, 8 bit DAC, I2S, I2C, touch sensor and SPI. This is the next step up if a standard AVR based Arduino® isn't powerful enough to do what you need.

ARDUINO® VS RASPBERRY PI
DIFFERENCES, STRENGTHS & WEAKNESSES

If you're new to this technology, you might be a little confused around what the primary differences are, and how they're used. While there are certainly many similarities on the surface, the reality is that these are more like "compatibilities", than fundamental similarities.

Raspberry Pi and Arduino® both represent different corners of programming and computing. While there's certainly some crossover in what you can make with them, many projects will squarely suit one or the other. Just as a semi-trailer is better at hauling freight than taking kids to school, Raspberry Pi and Arduino® Compatible hardware will suit certain projects over others too. Here's a little information to help you figure it out.

RASPBERRY PI OVERVIEW

Raspberry Pi is a mini computer, essentially like a low-powered version of your computer at home. They often run a simplified version of Debian Linux called Raspbian, which makes it great for running multiple applications and has support for Full HD 1080p graphics, even 4K for the latest Raspberry Pi 4.

Raspbian provides you with a user interface just like a regular computer, so you can use a mouse and keyboard to surf the internet, work on spreadsheets, code websites, and so much more.

Overall this provides power and flexibility for your applications, however increases power consumption and can be less stable (just like your computer) due to complexity.

Type: Very much like a full-size computer including operating system with multi-tasking and regular HDMI support for using a monitor.

Coding: Edit and recompile code in-place, in a variety of languages. The most popular language for development on a Raspberry Pi is Python.

Power: A full size Raspberry Pi 4 requires a 15W power supply. That's quite a lot of power for battery-powered projects. Some smaller Raspberry Pi boards (such as Zero W) use less power, and can get down to around 0.5W by shutting off the display ports and such.

Storage: Onboard microSD provides an easy route to store data. If that's not enough you can attach an external USB hard drive (or multiples) for virtually unlimited direct-attached storage.

Connectivity: Rich peripherals such as cameras and displays are fundamentally supported as well as network (Wi-Fi or wired) on most models.

Functionality: Linux packages are often available for powerful functionality such as Machine Learning, web servers, network management, and so much more. Due to the popularity of Raspberry Pi, many common requirements have Raspbian-dedicated packages available.

GPIO: The GPIO (general purpose input output) interface provides great hardware attachment for inputs such as sensors and switches, as well as outputs such as LEDs and motors.

Open Source: Raspberry Pi uses open source software, but is not open hardware. While some imitators do exist, you'll more than likely be using official Raspberry Pi hardware. This has the benefits of compatibility and reliability, but some in the community are frustrated with the lack of flexibility in what is a very "sharing" community.

Communications: Easy interface with virtually all communication protocols making peer to peer and API integration fairly simple. Support for SSL and other secure transmissions is generally no issue, however more complex functions may reach processor limitations.

Applications: Ideal applications: media centres, home automation projects, AI / Machine Learning education, cloud-controlled cameras, complex user-interface projects, and so much more.

ARDUINO® OVERVIEW

Arduino® compatible hardware is essentially just a microcontroller.

Arduino®-compatible hardware comes in all shapes and sizes, so it really needs to be considered as an approach to programmable hardware, than a specific capability or product.

Arduino® is like a versatile version of embedded electronics that you'd find in your microwave, a digital timer, a home router, many kids toys, and much more.

Arduino® boards essentially run one application at a time, which is programmed directly on to the board itself. This "single minded" approach means the software you develop can run reliably for very long periods and automatically starts going again if the board is power cycled too.

Type: Single application / single threaded programming approach. Great for simple, reliable hardware operation. Screen connection is possible with compatible hardware, however no rich graphics or video.

Coding: Requires a host computer (or capable hardware) to edit and recompile code. Primary language is C++ in the Arduino® programming environment. It is possible to use other languages but less common.

Power: Generally quite low power consumption, with very simple options to reduce overall usage to mere micro-amps, in certain cases (mostly depending on attached hardware).

Storage: A storage shield is generally required in order to expand beyond the limited onboard memory for Arduino® compatible hardware. If you're using a Wi-Fi/Ethernet compatible board, pushing data to the cloud is generally easier where possible.

Connectivity: Some boards include onboard Wi-Fi, with sheilds available to extend functionality if required.

Functionality: There are many code libraries available in the Arduino® community which expand functionality and simplify peripheral connection. However this does not extend to generalised computing as Arduino® hardware is not really suitable for this purpose.

GPIO: The GPIO (general purpose input output) varies based on the board you're using, however they're generally very powerful with more

Open Source: Arduino® is entirely open source and open hardware, so you may or may not be using official Arduino® hardware. There are more Arduino®-compatible third party boards around than genuine ones. However most people still use the official Arduino® IDE to code their boards. Because they're open hardware, most board designs are virtually identical to official versions, with differences mostly cosmetic only.

Communications: Supports a good variety of external communications including for use with APIs and peer-to-peer systems. However some aspects such as supporting secure socket layers (SSL) can overload the microcontroller depending on the data and complexity / frequency.

Applications: Popular uses: environment sensors, retrofitted smart devices, lighting controllers, servo controllers, simple robots, simple user interface controls, intelligent control management projects, and so much more.

RASPBERRY PI & ACCESSORIES:

Our range of Raspberry Pi products and compatible accessories continues to grow. We have added the more powerful Pi 4B 8GB SBC to the range and the Pi 400 computer/keyboard all-in-one, which is great for anyone just starting their Raspberry Pi journey. We will continue to expand the range so make sure you keep an eye on our website for more exciting new Pi products.

Raspberry Pi 400 Keyboard Desktop Computer

The Raspberry Pi 400 (Australian Keyboard Layout) puts the power of a Raspberry Pi 4 (4GB RAM) inside a keyboard in a layout any retro home-computer fan will be familar with. Whilst the "Keyboard Raspberry Pi" layout was clearly inspired by the iconic Commodore 64, the quad-core 64-bit SoC (ARM Cortex-A72 @ 1.8GHz) makes the C64's chip look like a Dorito. The combination of the fast CPU and 4GB memory makes the Raspberry Pi 400 perfect for everything from retro-computer games to thin clients. You can connect the Pi 400 to any modern Monitor TV via HDMI for crisp 4K HD visuals.

Prototyping Hat for Raspberry Pi

This prototyping hat for Raspberry Pi has a main area with gold plated holes that are spaced at the standard 2.54mm, making this ideal for use with DIP packaged ICs or sensors. Around the side of the board are 0.1" header strips and screw down terminals that tap into the GPIO, power and other interfaces for temporary (but robust) connection of components or wiring that can be easily removed. It also has a large prototyping area for PTH and SMD components.

Enclosure for Raspberry Pi 3B

If you're using your Raspberry Pi as a computer, you probably don't want all the pins and wires exposed to short out. This compact case is the perfect thing for protecting your Pi in fact it wouldn't even look out of place sitting next to your TV if you are using the Pi as a media computer. It has openings for the USB, HDMI, Ethernet, 3.5mm, Micro USB and microSD card ports on the Pi, and includes four screws to secure the case closed. The removeable end panel features cooling holes, and overall, the case is only millimetres longer than the Pi itself. If you do want to tinker with your Pi, the top can be removed to allow access to the GPIOs and other headers. For easier access to the GPIO pins and other headers, see XC9004.

Clear Acrylic Case for Raspberry Pi 3B with GPIO Access

This simple snap-together enclosure is the perfect way to protect your Raspberry Pi, but still be able to easily access the GPIO pins and other headers. The crystal clear acrylic doesn't hide anything, and if you are going to be connecting and disconnecting things, then this enclosure will keep your Pi from shorting out, while still allowing access via the hinged lid. For semi-permanent setups, there are slots in the lid for the GPIOs, Camera header and Display header. Another hole directly above the processor provides ventilation and allows mounting a small cooling fan.

Heatsink Case with Dual Fan for Raspberry Pi 4B

This precision metal heatsink case is so well made; it really needs to be marvelled at. It consists of two machined halves, one 1/2 fitted with two tiny heat extraction fans. Metal pads (part of the upper fan heatsink) are meant to touch the top of the processors to draw heat directly from them via thermal pads supplied. There is no better way to do this. The fans draw heat away from the pads. The Raspberry Pi 4B can run hot at high processing speeds and this unit is the ideal way to fix this. The Pi 4B basically clamps inside the heatsink, leaving all connections free to connect to the outside world. Basically is the same foot print of the Pi 4.

TOUCHSCREENS FOR
RASPBERRY PI:

Touchscreens are a great way to provide an intuitive user interface, and with the Raspberry Pi this is as easy as connecting any one of the touch screens from our range offering 2.8", 5" and 7" screens. The 2.8" and 5" Touch screens utilize Resistive Touch technology, with a pen option offering single touch operation. The 7" Touch screen utilizes advanced capacitive touch technology giving you the full multi-touch capabilities.

2.8" Touchscreen

This compact 2.8 inch screen provides 320 x 240 resolution and includes resistive touch functionality. It creates a small but functional user interface capable of displaying and controlling a Raspbian desktop. Low power requirement, powered directly from the GPIO pins. Custom image/ kernel drivers required for operation.

It can connect directly to a Raspberry Pi and can connect to any other HDMI source that outputs the native 800 x 480 resolution, via the built-in HDMI port. It also includes a resistive touch interface via the GPIO header. This module is designed to connect directly to the top of a Raspberry Pi, with a small HDMI double plug that locks the two together, but it can be used as a standalone display powered via the micro USB socket on the display. A backlight with switch is included. Now you can add a compact second display to your HDMI device, or make your own portable display device. Raspberry Pi Compatible

7" Touchscreen
with HDMI and USB

This 7 inch LCD screen has a resolution of 1024x600. It can connect directly to a Raspberry Pi as well as to any other HDMI source that supports the native 1024 x 600 resolution, via the built-in HDMI port. It also includes a capacitive touch interface. This module is designed to connect directly to the top of a Raspberry Pi, with a small HDMI double plug that locks the two together, but it can be used as a standalone display powered via the micro USB socket on the device. A back-light with switch is included. Now you can add a compact second display to your HDMI device, or make your own portable display device. Turn the Pi plus monitor combination into your own portable computer, small enough to install in a car, or even a custom 3D printed case. Some display and driver configuration may be needed for operation. This display works with Microsoft Windows® versions up to Windows® 10, and supports 5 point touch input (with the exception of Windows® XP which has single point touch).
• 7 inch
• 1024x600 resolution
• Capacitive touch screen
• Switchable backlight
• HDMI input
• Powered via one of the 2 micro USB ports. The other ports is for touch support
• Mounting tabs in each corner

FOR MICROCONTROLLERS
AUDIO & SOUND:

People are accustomed to communicating with sound, and it makes sense for our Arduino® to do the same thing. From generating a warning simple tone or responding to a noise through to playing back a recorded message, there are a variety of Arduino® modules and shields for making and detecting sounds.

Active Buzzer Module

Use this module to generate sound from your Arduino®; libraries are available to produce different tones and frequencies.
• Operating voltage 5VDC
• Active speaker
• 3 pin header
• Dimensions: 25(L) x 15(W) 10(H)mm

Microphone Sound Sensor Module

This unit is highly sensitive with the added advantage of having two outputs. An analogue output for real time microphone voltage signal, and a digital output for when the sound intensity reaches its threshold. Great to turn your Arduino® into a voice recorder or vox.
• 5VDC operational voltage
• Sensitivity potentiometer adjustment
• Dimensions: 43(L) x 16(W) x 13(H)mm

2 x 3W Amplifier Module

This remarkably small module provides a complete 2 x 3W stereo audio amplifier. Ideal for driving small speakers and earphones. Requires no external components.
• Operating Voltage: 2.5-5.5VDC
• Output Power: 2x3W @ 4ohm
• Efficiency: >90%
• Uses PAM8403 IC.

CHRISTMAS COUNTDOWN CLOCK

This fun to build clock displays the time and date, and most importantly the number of days until Christmas. When the sound module is triggered, a voice (it might be Santa) announces the number of days and weeks until Christmas followed by a Christmas greeting, keeping everyone entertained. There is some soldering and careful assembly required to complete this project.

ULTRASONIC THEREMIN PROJECT WITH ARDUINO®

This project is ideal for the musically inclined. Just like a traditional Etherwave-Theremin, this theremin plays back samples and modulates them depending on the distance of your hand to the sensor. This simple project doesn't need many parts to get its sound because it uses a few of the special hardware features of the ATmega328P chip in the UNO to do most of the work. There is some soldering needed in this project.

SKETCHES DEFINED

The sketch is the program that is compiled by the Arduino® IDE and uploaded to your main board. This is the software part of any Arduino® project. One of the great things about the Arduino® community is that they love to share ideas, and sketches can be found in the Arduino® IDE and in many places where users show off their projects on the internet.

FOR MICROCONTROLLERS
WI-FI/NETWORK/COMPUTER:
You might think it's a bit of a stretch to put an Arduino® in the same category as a computer, but with the right modules and shields, you can almost be on the same level. With a Wi-Fi or Ethernet connection, your Arduino® can be serving up web pages or communicating over great distances. Add a USB host shield, and connect a keyboard or mouse, and you've got an easy to use interface for your next project.

Low Cost Long Range Data Communications

LoRa™ is a powerful new technology enabling secure wireless data communications over long distances even several kilometres without the need of a mobile GSM network. LoRa™ can be used in many outdoor or indoor applications, such as building automation, weather monitoring, irrigation systems control, smart metering, smart cities, and much more. For more information about LoRa™ visit www.lora-alliance.org

LONG RANGE LORA SHIELD CAT. XC4392
The Arduino® Compatible Long Range LoRa™ shield turns your Arduino® into a LoRa™ node capable of transmitting and receiving data over long distances, even several kilometres, without the need of a GSM network. The perfect solution to your remote sensor and control projects. An external antenna is included.
• Compatible with 3.3V or 5V I/O Arduino® Board
• LoRa™ frequency Band: 915MHz
• Low power consumption
• Includes external Antenna (via I-Pex connector)

Note: Radio transmitting devices must be used in accordance with Australian Communications & Media Authority guidelines (www.acma.gov.au)

ETHERNET IO CONTROLLER WITH ARDUINO®

This clever project uses our XC4412 ethernet shield to connect your Arduino® to a wired network so you can access it across the Internet. See and change the current state of the IO pins, so you can turn devices on and off remotely across the Internet. Use it to turn on the lights in another room (relay module required), see if someone has left the fridge door open (analog light or temperature sensor required), see if it's raining outside (rain sensor module required).

IR/RF:

We'd be pretty lost without wires connecting everything together, but sometimes it can be handy to make the connection without getting all tangled up. Check out the shields and modules below for ways to connect wirelessly. Alternatively, control an existing wireless device like the IR remote on your TV, or get data from the 433MHz transceiver on your weather station.

IR Remote Control

Forget borrowing the TV remote to add IR remote control to your next Arduino® project, and give it its own dedicated remote. Compact design with 21 buttons including numbers and channel controls. Takes a single CR2025 battery.

POWER/VOLTAGE CONVERSION:

Getting power to your Arduino® project is fairly important, and will probably need extra components if you want to take what you're building beyond the reach of the USB cable on your computer. From charging batteries to converting between systems running off different voltages or even getting power to your breadboard, you'll find something to help amongst the modules below.

Logic Level Converter Module

While most of the modules used in the Arduino® world are 5V logic, some are 3.3V. And unfortunately, connecting them directly often results in "letting out the smoke!" This little module is the answer. Provides two bi-directional channels to safely marry 3.3V with 5.0V. Drops straight into solder-less breadboard or can be soldered into your own PCBs.

FOR MICROCONTROLLERS
MOTOR/POWER CONTROL:

Practically all motors use more power than any of the pins on Arduino® Main Board can supply, so we need to use a Motor Control Shield or Module to interface. Most motors also operate off a voltage different to 5V, and many of these Shields and Modules will provide regulation of higher input voltages down to 5V for your Arduino® main board as well. Of course, these boards aren't limited to just driving motors, they are suitable for many power control applications.

L293D Motor Control Shield

This versatile board has 2 x 5V servo ports connected to the Arduino® high-resolution dedicated timer to ensure jitter-free operation. It is also capable of driving up to 4 bi-directional DC motors with individual 8-bit speed selection, or up to 2 stepper motors with single/two/interleaved steppings.

• 5V to 16VDC
• 4 H-Bridges: per bridge provides 0.6A (1.2A peak current) with thermal protection
• 2 external terminal power interface

The four and eight channel versions even have optical isolation to protect your duinotech. While the one channel version operates directly from 5V.

• Status LEDs show channel status
• Active High logic
• Screw terminals for easy connection to relay contact.
• SPDT Relays
• Current Ratings: 10A @ 250VAC, 10A @ 30VDC
• Four mounting holes on each module

WHAT IS A SHIELD?

A word that you will hear a lot on these pages is SHIELD. For the purposes of Arduino, a shield is not a thing to protect you in a swordfight, it's a description for a device that will go with another Arduino® device. It could be a temperature sensor, a music generator, or even a Wi-Fi adaptor, etc. Sometimes the word "Module" is used as well. Both terms have an interchangeability about them.

FOR MICROCONTROLLERS
INPUT & CONTROL:

With any Arduino® project, there'll be a point where you need to provide some input to tell it what to do. From steering a robot in real-time to changing a setting occasionally, there's a shield or module that will help you control your sketch.

16 Key Touch Keypad Module

A compact 16 key touch interface for your Arduino® project, based on the TTP229 capacitive touch sensor IC. Use the module as it is, or extend wires from the pads to create external touch pads.
• Works on 2.4-5.5V
• Onboard power indicator
• Two wire serial data interface
• Dimensions: 65 x 50 x 12mm

Touch Shield

The MPR121 IC is a great way to build simple capacitive touch interfaces, and now it's even easier to incorporate into your Arduino® projects with the touch shield. The touch shield has 9 capacitive touch pads, with headers for the remaining 3 electrode connections. With this shield you can have a total of 12 touch sensitive buttons. An on-board logic level converter allows it to work with 5V and 3.3V Arduino® boards Simply solder on some header pins and stack it on to your Arduino® for a convenient input device.

Heart Rate Sensor Module Kit

Make your own health and fitness monitoring project with this heart rate monitor sensor kit. The compact board measures the electrical activity of the heart via three ECG electrode sensors, then filters and amplifies the analogue signals so that the heartbeat can be charted as an ECG or electrocardiogram using your Arduino® or similar microcontroller. Powered by 3.3V. Kit includes the heartbeat sensor board, 3 x adhesive ECG pads and a colour-coded connecting cable. A 12-pack of spare adhesive ECG pads are available separately (XC3785).

Heartbeat Sensor Module

An easy way to provide pulse rate measurements from a person's finger, earlobe or wrist to your electronics project. At the heart of the board is the MAX30102 IC, which is an integrated pulse oximeter and heart rate monitor sensor. Data from this sensor is communicated to your microcontroller using standard I2C communications. Other features include ambient light suppression and low-noise circuitry for optimum performance. The tiny board measures just 20 x 15mm, and runs from 1.8V to 5V (optional 1.8V or 3.3V IIC voltage switching onboard).

Specifications	XC3740

If you're building your own arcade game, whether it's with a PC or Raspberry Pi, you'll need a joystick. This interface board allows you to easily interface joysticks like our SM1052 and arcade pushbuttons like SP0662, SP0664, SP0665, SP0666 and SP0669 into any device that can connect to a USB joystick. It could be used for arcade games, flight simulators or anything that works with a USB joystick.
• Up/Down/Left/Right inputs
• 12 button inputs
• Detachable USB lead for fitting through small holes
• Includes 10 pluggable leads that connect directly to spade terminals on SM1052, SP0662, SP0664, SP0665, SP0666 and SP0669

LED TESTER WITH ARDUINO®

A handy little tool that can help you out if you work with LEDs, especially if you are always trying to work out the right resistor to make them work. The idea has been inspired by Dave Cook's model at http://robotroom.com/LED-Tester-Pro-1.html We have written the code from scratch to suit the parts we have available in the duinotech range.

See step-by-step instructions at:

• Adjustable test current
• Displays LED Forward Operating voltage
• Calculates ideal resistor & gives Cat. number for a design voltage and current
• Only 3 discrete components to be soldered
• Detachable shields - pull it apart & use for other projects

COMPASS/ORIENTATION/GPS:

We pretty much take for granted many of the sensors that are on our phones these days- compass, GPS, accelerometer, but did you know that you can also add similar features to your Arduino® projects? You could use a compass sensor to help guide your robot or an accelerometer to keep your Arduino® controlled gimbal facing upright, or even provide a tilt-based user input device for next project.
3 Axis Digital Compass Module

This module allows you to take accurate compass bearings, no matter how it is orientated. Easily interfaced via I2C.
- Operating Voltage: 5VDC
- Resolution: 12bits
- Interface: I2C
- Includes 5V - 3V level shifter
- Dimensions: 20(L) x 16(H) x 5(H)mm

Tri-Axis Digital Tilt Sensor

Use this high performance acceleration sensor in your project to detect direction (transverse/longitudinal), as well as free fall, pulse, and shake detection. The on-board MMA8452Q is a smart low-power, three-axis, capacitive micromachine acceleration sensor with 12-bit resolution. Users are able to set a range of ±2g, ±4g, or ±8g, which can output high-pass filtering data and non-filtered data in real-time. An embedded function can also be used to generate an inertial wake-up interrupt signal, which enables MMA8452Q to maintain a low-power mode in the static state while monitoring the event.
- 12 bit and 8 bit digital outputs
- I2C digital output interface (up to 2.25MHz with 4.7kΩ pull-up resistor)
- Two programmable interruption pins applied to six interruption sources
- Three motion detection embedded channels: free fall detection, pulse detection, shaking detection
- Direction (transverse/longitudinal) detection with setting lag compensation
- Automatic arousal and auto-dormant ODR can be automatically altered
- High-pass filtering data can be exported in real time
- Dimensions: 35(L) x 20(W) x 7(H)mm

Duinotech GPS Receiver Module with On-Board Antenna

Add GPS positioning down to a 2.5m accuracy to your next project with this compact GPS module. Based on the NEO-7M that supports the NMEA standard protocol output, and features built-in flash to save settings after power-off, without an external EEPROM. An onboard ceramic antenna means you don't need an external one, however, an SMA connector is also attached if you wish to attach your own antenna to improve reception. The micro USB interface enables you to debug the GPS module via a data cable, and a reserved serial port interface for USB-to-serial port modules or external MCU enables you to easily receive the GPS data.
- On-board signal LED indicator
- 3.3V or 5V operation
- Onboard & external antenna options
- 9600 Baud Rate
- 1Hz Output Frequency
- Dimensions: 53(L) x 26(W) x 15(H)mm

Please note: When connecting an external antenna the C2 capacitor on the module needs to be removed. If the internal and external antennas are used together they will interfere with each other, affecting positioning.

NFC & RFID:

RFID technology is one of those things that is everywhere around us, including security systems, bank cards, public transport cards and even passports. Using a RFID module or shield you can read (and write to, depending on how secure they are) RFID cards and interact with NFC enabled items like mobile phones.

Data Logging Shield

Extremely easy to set up. Use this datalogging shield to store your data to files on any FAT16 or FAT32 formatted SD card, or have it to be read by any plotting, spreadsheet or analysis program. All data stored is timestamped in real-time so you know precisely what happened when! Uses a 3.3V converter to avoid damaging your SD card. Includes a 3V button battery.

CLOCK & TIMING:

If you have a project that needs to keep time, even when your Arduino® is powered down, then check out these modules and shields. Sporting a 'Real Time Clock', they have a small battery backed IC which keeps track of the seconds, minutes, hours, days and even years. Operation times of a year can be expected – even longer if the project has external power.

Real Time Clock (RTC) Module
This tiny little module will keep accurate time using the supplied CR2032 button battery. Great to use with all of your Arduino® projects that require the use of the date and time such as clocks, data-loggers and timers.
• Using a 24C32 32k EEPROM

DISPLAYS:

One of the most useful things a device can do is communicate information to us- our smartphones wouldn't be much use without their screens! Your Arduino® is much the same, and most projects require some information to be communicated about the sensors they're reading, or how they're doing at the little task we've set them to. Here's a guide to the many different displays that make up the Arduino® range, and some tips on choosing the best one for your application. Whether it be reading out a single number or some brief words, or even a complex graphical display, there's one to suit your project.

3.5" Touchscreen with Enclosure & Stylus

Perfect for prototyping or to set up a portable device with your Raspberry Pi 3B+. The 3.5" LCD touchscreen requires minimal setup. Supplied with a handy stylus and protective case.

8 Digit 7 Segment Display Module

Building a project with heaps of 7-segment displays is always going to look awesome, but unless you have the right hardware, it can use up a lot of IO pins. The MAX7219 based 8 Digit 7 Segment Display module takes care of that, running all eight digits from just three IO pins. Extra units can be daisy-chained from the end of the previous unit for truly huge displays.

WS2812 RGB LED Module

The WS2812 RGB LED module provides full PWM control of the three LED channels in a single IC with control from a single pin. The IC is mounted on a small PCB that suits 0.1" pitch protoboards and breadboards. Can daisy-chain modules.

• Great for creating custom RGB LED displays
• Same IC as XC4380 Arduino® module

LED & LASER:

Sometimes when you need to provide output from a project, a full-on display is too much, or takes up too much space. The modules below are great if you want to your sketch to show what's going on with a simple 'GREEN IS OK' type of indication. If you want to shine some light and a basic LED is not enough, look at the higher powered XC4468 LED or XC4490 Laser modules.

OBSTACLE AVOIDANCE & DISTANCE DETECTION:

What good is a robot if it can't gather information about its surroundings? This collection of modules is ideal to add to a robot or roving autonomous project. You could use an array of XC4442 Ultrasonic Sensor Modules to map out a robot's surroundings and have the Arduino® plan its next movement, or use the XC4611 Triple Reflectance Module to sense the surface underneath your robot, or even create a space age musical instrument like the Ultrasonic Theremin.

PIR Motion Detector Module

A pyroelectric infrared PIR motion sensor is a handy addition to any Arduino® project. Wide operating range and delay times changeable via two potentiometers giving this module versatility to the user, it is a must for any security application.

- Working voltage: 5-20VDC
- Quiescent current: 65uA
- Level output voltage: High 3V / Low 0V

DATA STORAGE:

An Arduino® has a fairly limited amount of storage (certainly compared to the terabytes of data that can be stored on some hard drives), so the shields and modules below can be used to provide an extra place to log data or store resources for your sketch. You might even use one of them to write to a removable card to make it easy to get data to and from a computer.

Data Logging Shield

Extremely easy to set up. Use this datalogging shield to store your data to files on any FAT16 or FAT32 formatted SD card, or have it to be read by any plotting, spreadsheet or analysis program. All data stored is timestamped in real-time so you know precisely what happened when! Uses a 3.3V converter to avoid damaging your SD card. Includes a 3V button battery.

RTC POWER POINT TIMER WITH ARDUINO®

Using Arduino® to control a 240V appliance but don't want to get zapped? Well then, here is your solution. Building on the simplicity of the Arduino® Clock, we've developed a project that interfaces to our MS6148 Remote Controlled Mains Outlet using a 433MHz transmitter and adding some extra code, gives you a mains timer with the following features:
• **Switch on/off appliances with a minute of resolution**
• **Keeps time during power off**
• **Programme up to 99 timers**
• **Can be set for any or all days of the week, weekdays or weekends**
• **Can be set to turn single channel or all channels on or off**
• **Manual control of transmitter for setup and troubleshooting**
And being Arduino®, there's nothing to stop you taking the code apart and adding your own features.

DUINOTECH METRONOME
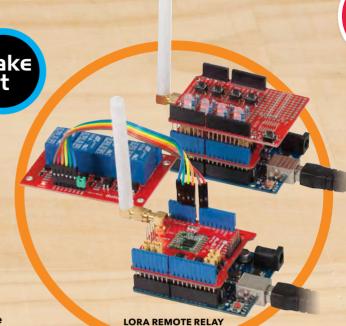

Make a Metronome

We usually think of soldering irons, pliers and oscilloscopes when we think of electronic tools, and while this project may not be useful to the electronics enthusiast, we think it's a good way of showing how Arduino® based tools can be useful in other fields- in this case for musicians.

The Duinotech Metronome has adjustable tempo between 20 and 240bpm, and can be set to accent anywhere between every beat and every eighth beat. It also gives a display of the classical name for that tempo.

PROGRAMMABLE REMOTE CONTROL

Build a Programmable Remote Control

One of the really great things about the Arduino® community is how many extra features they have added to the IDE.

In this project, we'll be using a library which has been created by one of the members of the Arduino® community, and has been added to by other members.

It's a Programmable Remote Control, which is perhaps similar to a 'Learning Remote Control', except that it can give a lot more information about the codes it is sending. Check out the library documentation for the protocols that are supported. Some soldering required!

You'll also need some offcuts of wire to build the project- we used some coloured ribbon cable offcuts to help identify which wire is which.

LORA REMOTE RELAY

LoRa Remote Relay

We are very excited to get the chance to play with our new LoRa Shields, and test just how far we could get a signal using LoRa technology.

With one of our tests, we were able to get a signal to travel about 200m, including through the corrugated iron of the warehouse and the concrete office building.

We set about building a practical project that would make best use of the technology.

The LoRa Remote Relay is basic- four buttons at one end and four relays at the other end.

It also has LED's next to the buttons, so unlike other remote relay systems, there is feedback that the relays are operating as commanded.

TRAILER VOLTAGE MONITOR

Build a UNO Programmer

The idea of using an UNO to program an UNO sounds a bit meta, but with a USB Host Shield, we managed to program our UNO's. In fact, the programming only takes about three seconds per board, which is even faster than we could unpack them. Some soldering required.

jaycar.co.nz/uno-programmer

Trailer Voltage Monitor

One of the guys at the office here asked if I could build an Arduino® device for monitoring the voltage of the 12V battery in his trailer- as now required for registration of some trailers which have electric brakes. Here's what we built- and it's a bit cheaper than some of the offerings out there.

DUINOTECH THERMOSTAT

WIRELESS GARDEN MONITOR
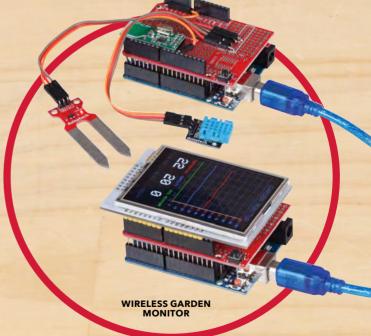

Make a Duinotech Thermostat

Here's a project that will take you into the world beyond the basics of the duinotech Learning Kit. We're going to build a project that shows how we can use the Learning Kit with other modules, and also how to incorporate an external library to extend our programming possibilities.

It's a thermostat, which is nothing more than a relay which responds to temperature.

We've added some colour to it by connecting some LEDs to give an indication of the current temperature.

jaycar.co.nz/arduino-thermostat

Build a Wireless Garden Monitor

Here's a project that uses two Arduino® boards to communicate wirelessly- the first Arduino® reads a soil moisture sensor and a temperature and humidity sensor, and sends the data to a second Arduino® that displays the data in a graph and text. You can use it to monitor when your garden needs watering, or even as a basic weather station. Alternatively, you could use completely different sensors to create your own custom monitor.

RETRO > Gaming

Now you can create your own Retro Gaming console and still have professional controls and finish.

These enclosures allow you to install your own Raspberry Pi and get a true retro experience, with quality user controls.

Raspberry Pi Retro Arcade Game Consoles

Let the games begin with this exciting retro arcade console. The console with classic design features a joystick with six buttons for two players, Simply install a Raspberry Pi V3 or V4 into the console, insert a Retropie installed microSD card, copy over some ROMS and you are ready to battle and enjoy some of your old favorites. The brains of this arcade console is a Rapsberry Pi, video is sent via HDMI to connect to a TV, computer monitor or projector, and an audio out via the Raspberry Pi's 3.5mm headphone jack allowing you to connect to an amplifier or active speakers. The case measures 650mm wide and has anti-slip rubber feet for stability. Supplied with mains power adaptor, 3m VGA lead, 3m HDMI lead, 3m USB lead, and two replacement gaming buttons. Recommended for ages 15+.

BBC MICRO:BIT & ACCESSORIES

MICRO:BIT & ACCESSORIES

BBC micro:bit V2 GO Development Board Bundle

The micro:bit is an open source system originally designed by the BBC for use in computer education in the UK and is now available in Australia. Described as being about half the size of a credit card, you can use the accelerometer to detect movement and tilting or the magnetic sensor to detect metal or create a compass. Uses for the 5 x 5 LED display are limited only by the imagination and 2 on-board input push buttons provide instant control. Another 3 inputs are provided via the 5 ring connectors (the other 2 are for power and ground) which can be accessed via alligator clips or banana connectors. On top of this, the ring connectors form part of a larger 23 pin edge connector for more advanced projects. And if that isn't enough, USB and Bluetooth® connectivity allows interfacing with other peripherals! The version two micro:bit board comes now with microphone and speaker so you have easier ways to use sound and touch to get creative. Programming can be done via Microsoft MakeCode or MicroPython, both of which are available on the micro:bit foundation website. Power is via USB or the provided 2 x AAA battery holder (batteries included).

Duinotech BBC micro:bit V2 Starter Kit

If you are just getting started in the world of electronics and coding or want that ideal gift for a young maker, this kit is the perfect choice. No soldering or prior programming knowledge is required. At the heart of the kit is the micro:bit V2 board which is a powerful, handheld fully programmable microcomputer, designed by the BBC. It has an accelerometer to detect movement and tilting, a magnetic sensor to detect metal or create a compass, and up to 23 inputs to connect to the physical world. The board also has a 5 x 5 LED display and two onboard input push buttons provide instant control. The kit includes common electronics components from resistors to a servo motor, and all the necessary prototyping accessories to get building. A 36-page beginner's guide is also included to get you started.

This is an update to the original XC4322 kit and is now based on the recently released micro:bit V2 board

WEARABLE TECHNOLOGY HARDWARE

These products are designed to be sewn onto a costume or fabric based project to provide amazing lighting effects. Combine with other LED Raft Pads, Slide Switch Power Pads, and Battery Holder Power Pads, sold separately, to create a dazzling 'light show' on your e-clothing, cosplay outfit, mask, hat, hero cape, jacket, handbag and other theatrical designs. Sew together using the Stainless Steel Conductive Thread.

LED Raft Pads

The lightweight board measures approximately 13mm in length and has a surface-mount LED with resistor to limit the current. Two large sew tabs enable you to easily sew the raft pad onto the fabric using conductive thread (use WW4100, sold separately).

RGB LED Raft Pads

The lightweight board has a surface-mount RGB LED with resistor to limit the current. The LED is addressable, which means they can be daisy-chained together and controlled individually from a microcontroller (eg. Arduino). Four sew tabs enable you to easily sew the raft pad onto the fabric using conductive thread (use WW4100, sold separately).

Silicon Rubber Hook up Wire for Electronic Clothing

This wire is superior to conductive thread for wiring clothing for LED lighting effects in clothing. It is insulated so wires can cross over each other without short circuits. It is extremely flexible and can be sewn (with a large needle) but it is better to hot melt glue the wires in places. It works well for large, complex clothing lighting projects where crossover wiring is very desirable.

3m EL Wire

Add amazing colourful lighting to your party, costume, signage, decorations, etc. These 3m long flexible wires can be bent into most shapes and glow (similar to a neon light) when power is applied. Power is provided using the compact EL controller (SL2440 sold separately), which runs off 2 x AA batteries, making it extremely versatile and portable.
At only 2.3mm diameter it can be easily stitched into clothing or fastened with cable ties. Excess length can be cut off to suit your application (note: can't be re-joined). Up to 3 x EL wires can be connected at the same time to the same controller using 2 or 3 way splitters (sold separately).

ELECTRIC MOTORS

MOTORS & GEARBOXES

Low Cost Motor / Gearbox Set

This unit comes complete with a 3V 12,000 rpm motor*. It can be stepped down (with the consequent torque multiplication) up to six times as shown below. The motor is fitted with a 12 tooth pinion and the small gear cluster is 12 tooth. The large clusters are all 48 tooth. Not all gears need to be used. The intermediate output shafts are hardened steel, 3mm dia. Also supplied are press fit pulleys. The whole assembly snaps together. Hand tools are almost unnecessary.

Motor can also be varied by changing input voltage but this lowers torque.

- Motor cage - 40(H) x 25(W) x 28(D)mm
- Gearbox cluster - 40(W) x 25(D) x 30(H)mm
- Main & intermediate shafts - 63 x 3mm Dia. Supplied in kit form

Note: All DC motors and motor gearboxes can change speed to a considerable amount by changing voltage within specified limits. This reduces need for special gear ratios for your application.

Hand Crank Dynamo with Geared Motor

Here's a great gadget that will allow you to add Green power to any of your projects. What we have here is a hand crank dynamo, pre-assembled but easily modified to be retro-fitted to existing equipment or added to new projects. Crank the handle and the specially designed gear set will operate the motor and produce a DC voltage which can be used for a variety of low current uses (charging batteries, lights etc.). Crank slowly and the voltage is low, crank harder and the voltage is higher. Made from plastic - easy to re-work to fit your projects.

TAMIYA POWER TRANSMISSION COMPONENTS

Single Motor 4 Speed Gearbox / Axle Assembly

This brand-new Tamiya product features an all plastic moulded gearbox and motor casing. Included is a FA-30 type 3 volt electric motor, axle with 2 crank arm and tube of grease.
These gear ratios are user selectable:
12.7:1   114.7:1
38.2:1   344.2:1

Double Motor Independent 4 Speed Gearbox / Axle Assembly

Basically a double version of the unit above. Each motor can be separately driven and therefore when wheels are connected could rotate on the spot. Each gearbox is independent so it is possible to set different gear ratios for each box. Includes 2 x FA-30 type 3 volt motors.
The following gear ratios are user selectable:
12.7:1   38.2:1
114.7:1   344.2:1

Worm Drive Set

This set consists of a worm gear 24mm long x 12mm dia with an 8 turn worm screw. The worm has a 2.8mm axle hole which could probably be carefully drilled out to a larger diameter. The spur gear is 1/4" (6.35 wide) and 1 & 5/8" (41.2mm) diameter with a number of regular pitch-concentric 2.8mm holes across the face of the gear including one dead centre. It would be drilled out to accommodate a larger shaft. This gear has 40 teeth. Both are moulded in an engineering grade plastic.

PRE-ASSEMBLED MODULES

Universal Amplifier Modules

1 CHANNEL 3.5 WATT

Ideal as a bench-test amplifier for audio sources, or even as a mono headphone amplifier, this small audio amplifier can be operated from 4.5 V up to 12 VDC. Use two for stereo.

Specifications	AA0223 - 3.5 WATT
Output Power	3.5 W (max)
Operating Voltage	4.5 to 12 V
Speaker Impedance	4-16 ohms
Input Sensitivity	< 80mV
Frequency Response	40Hz-20kHz
Dimensions	30 x 25 x 15 mm

1 CHANNEL 12 WATT

Small audio amplifier module is suitable for a number of purposes and has a range of suitable input voltages and load impedances.

Specifications	AA0225 - 12 WATT
Operating Voltage	6V - 16V, 800mA (max)
Output Power	12W (max) into 4-16 ohms
Frequency Range	40Hz-20kHz

Multi-Voltage Regulated Adaptor Module (Stepdown)

Ideal for when you need a reliable voltage source for a portable CD player or similar battery-powered device. Another use for this adaptor is for a peripheral computer power supply to power external Blu-Ray drive, powered speakers, modems, etc. Plug the input into your PC's internal power supply cable and get selectable regulated voltage out from 3 to 15VDC*. Output current capability is around 1.5 amps.

- Dimensions: 63(L) x 24(Dia.)mm

*Note: *Input voltage MUST be larger than the required output voltage.*

3 Amp 24V to 12V Reducer

Many trucks and boats use 24V systems. These converters will allow you to run a reasonably sized 12V car-stereo or other devices from a 24V supply. Heatsink (not included) should be used for superior performance.

Specifications	AA0266
Short-Circuit Protection	Thermal cutout
Input Voltage	24 to 26VDC
Output Voltage	12VDC
Maximum Load	3A
Dimensions	135(L) x 50(W) x 24(H)mm

DC to DC Converter Modules

Converter modules that can step-up or step-down voltages so you can power your devices where a different power source is present. This could include powering 12VDC devices from a 6VDC motorbike battery or to run 12VDC devices from a 24VDC battery found in trucks. They feature protection against short-circuits, overload and over-heating.

Battery Discharge Protector

Protects your car battery from total discharge by switching off appliances before the battery voltage drops to an unrecoverable level. When battery voltage is re-established by recharging, it switches appliances on automatically. The interrupting voltage is adjustable to 13.3 VDC. Essential low-cost insurance if you have a dual battery setup in a boat, 4WD, RV or for an alternative energy system such as solar or wind power.

Specifications	AA0262
Max. Switching Current	12V / 20A
Interrupting Voltage	10.4 - 13.3VDC
Resetting Voltage	approx. 0.8V (+/-0.3V) above interrupt voltage
Current Consumption	< 0.7mA when OFF, < 1.6mA when ON

Speedo Corrector Module for Cars

When you modify your gearbox, diff ratio or change to a large circumference tyre, it may result in an inaccurate speedometer. This module alters the speedometer signal up or down from 0% to 99% of the original signal. With this improved model, the input setup selection can be automatically selected and it also features an LED indicator to show when the input signal is being received.
• Power: 12VDC

	AA0376	$58.90	$52.90	$46.90

Frequency Relay Module for Cars

It uses a standard tacho, road speed, or many other pulse outputs to switch a relay. The switch frequency can be set to trip when it is rising or falling, and it features adjustable hysteresis (the difference between trigger on/off frequency). You could configure it to trigger water spray cooling on deceleration, shift light activation, adjustable aerodynamics based on speed, intake manifold switching and much more.

12 Volt Twilight Switch

This handy module senses the ambient light level and will switch external devices on/off at night and in the morning. The unit operates from 12VDC and its changeover contacts are rated at 25VDC @ 3A. Power consumption is only 2mA so it is ideal for automotive or battery-driven applications. Use it for garden lighting or security applications etc.

12V 3A Timer Module 2 Seconds to 23 Minutes

A versatile and useful timer module that can be set for periods of 2 seconds to 23 minutes. The start and stop functions are controlled by simple switch inputs and the relay output can control a device of up to 25V 3A.

Specifications	AA0364
Operating Voltage	12 - 15VDC
Current Consumption	20mA/80mA (Relay off/on)
Relay Point	Single pole, 25VDC, 3A
Time Adjustment	2 sec to 23 min (+/-30%)
Dimensions	87(L) x 60(W) x 33(H)mm

12VDC 8A Dimmer/Motor Speed Controller

DC speed controllers are ideal for slowing down pumps and motors or dimming lights, but some use resistance circuits or rheostats which are very inefficient. The pulse width modulation (PWM) used in this controller allows you to vary the output from 0 to 100% while maintaining a very high efficiency. When used on motors this ensures full torque is available at very low speed and the motor won't shudder at start-up. Operates on any 12VDC system and capable of controlling devices rated at up to 8 amps.
• Internal circuitry is fully potted & the control potentiometer is splash proof making this suitable for marine environments and other harsh conditions

Mains Motor & Lamp Controller

This module can be used for various mains rated applications including lamp dimming, soldering iron temperature adjustment and universal commutator motor speed control. Features a 600W continuous and 1200W peak loading capacity with adjustable potentiometer control. Please note: fluorescent, quartz and energy saving lamps, and motors with starting capacitors should not be used with this module.
• Knob included.

Specifications	AA0346
Continuous Power	600W
Maximum Power	1200W
Dimensions	62 x 35 x 21mm

Please note that this kit operates on 240VAC mains voltage and you should be extremely careful when using these voltages. If in doubt, have an electrician check your work before applying power.

Programmable Interval 12V Timer Module

An easily programmed low cost electronic timer. It operates from 12VDC, with low current drain: <50mA when relay is on, <5mA when relay is off. It is link programmed for either a single ON timing period, or continuous ON/OFF cycling and can be link programmed for any of 48 different time periods, separately for ON time and OFF time. Selectable periods are 1/2/3/4/5/6/7/8/10/20/30/40/50/6 0/70/80 seconds, minutes and hours. It may be restarted at any time simply by pressing the reset push button.

LED Tester

With this basic but essential tool it is possible to check the function, brightness, colour and polarity of most kinds of light emitting diodes (LED). The LED to be tested plugs into the front panel, at the current you wish to test it with. Two 10mA positions have been included on this multi-LED tester so that comparisons between two LEDs can be made simultaneously.

ELECTRONICS PROJECTS FOR KIDS

SNAP-ON PROJECTS & KITS:
These kits allow children 6 years and older to learn about electronics whilst having fun. All of the brightly coloured parts simply snap together without any need for screws or soldering. The parts can be easily taken apart to be reused for other experiments over and over again.
- Suitable for ages 6+
- No tools or soldering required

Salt Water Fuel Cell Engine Car Kit

An entertaining educational kit demonstrating the concept of a salt powered automotive engine. It gives the next generation a look at alternative means of propelling cars of the future. It works with a combination of salt water and magnesium plates. When salt water is added it dissolves the magnesium to form hydrogen which is attracted to the cathode creating a flow of electrons. A detailed step by step assembly manual for connecting the myriad of components is included and the car engine can be configured as a V8 or flat engine. The cylinders also move up and down as the car moves forward. The finished vehicle is 4 wheel drive and the body will twist as it navigates its way over small pebbles and bumps. Watch a demonstration video on our website. You may require the use of a side cutter and flat/Phillips head screwdrivers.

Frilled Lizard Robot Kit with IR Sensor

A super smart frilled lizard with artificial intelligence. It has an infrared sensor that is programmed to 'escape' or 'follow-me'. Once the infrared sensor is activated in the 'escape' mode the robot will automatically act shocked by spreading its frill, dropping its jaw, illuminates its bicolour LED eyes and will scamper away from you until it reaches a safe place. If the infrared sensor is switched to the 'follow-me' mode using the 2 way function switch, then the robot will assess danger by bluffing the attacker (unfurling and shaking its frill). When the robot does not sense danger it will proceed to follow you like a pet lizard. Suitable for ages 10+.

ROBOTIC CONSTRUCTION KITS CONTINUED

3-in-1 All Terrain Tracked Robot

There are a lot of parts to assemble in this kit, including the hard-wire remote control. You do, however end up with a fantastic piece of robotic gear. It is primarily a terrestrial 6 track (i.e. 3 separate tractor-crawlers each side) unit. The crawlers can be reconfigured to operate as grippers, or even as a forklift type mechanism. You will need lots of time to put this thing together, but it will be a pleasure as the 50 page instruction manual is superb with dozens of good old-fashioned line drawings, which are still the best for clarity. There is very little electronics (indeed none really) but a tremendous amount of mechanical assembly. Electric motors are included.

This kit could form the basis of a sophisticated robotic platform with the addition of feedback systems, much of which is in the Jaycar catalogue.

Mini Smart Car Robot Kit to suit micro:bit

A fun to build robot that uses a micro:bit microcontroller board (sold separately) that kids can code or control using their Smartphone via Bluetooth. The kit is easy to assemble and no soldering is required. The included infrared and ultrasonic modules connect with the micro:bit, which enables the robot to follow a line, avoid or follow obstacles, and more. Other features include an onboard buzzer to produce sounds, an 18 RGB LED ring for amazing colour effects, and a photocell to detect light intensity. Two large RGB lights on the front are used to indicate the robot's direction as it travels. Once kids are competent using the micro:bit, they can create their own code to get the robot to use the micro:bit's accelerometer, compass, and 5x5 LED matrix. TELESCOPE & MICROSCOPES

TELESCOPE & MICROSCOPES

Junior Telescope Kit

This astronomical telescope is designed to give children a close-up view of the moon and stars. The angle adjustment levers and focus knob are designed to be easy to operate by small hands, and the finderscope on the side helps find objects in the sky much quicker. The multi-coated lens provides a high refractive index to help make images clearer, brighter and sharper without dark edges, and the interchangeable 20X, 30X and 40X Barlow lenses help get the best view. A universal Smartphone bracket is also supplied so you can take and share photos of what is seen through the telescope. Fold-up tripod included. Suitable for ages 6+.

Junior Microscope Kit

This biological microscope is designed to enable curious children to explore the micro world around them. The adjustment knobs make it easy for small hands to operate, and a 360° rotating eyepiece holder makes it more convenient for kids to share. The switchable 10X and 20X eyepieces, combined with the 4X, 10X and 40X objective lenses provide an impressive combined magnification up to 1200X, and 5 different apertures and 4 colour filters help improve the optics. Integrated upper and lower white LEDs illuminate 3D objects or specimins for a clearer view (2 x AA batteries required - not included). Supplied with a wide range of child-friendly accessories, including a pre-prepared slide so the microscope can be put to use straight away. Suitable for ages 6+.

5MP USB 2.0 Digital Microscope with Professional Stand

A USB microscope with a simple but incredibly useful stand that allows you to make fine adjustments to the vertical height of the microscope and swivel the scope arm around a 360 degree range. This permits a greater level of viewing accuracy and stability. The sharpness of texture on magnified objects is incredible to look at you will spend hours searching for things to magnify (check out a full resolution 5MP capture on our website).

It comes with a great piece of software for capturing 5MP (2592x1944) res JPGs, BMPs, TIFs or PNGs and 1280x960 pixel AVI files.

Excellent for educational purposes or a myriad of practical applications such as technicians, jewellers, laboratory work, and much more.

Solar Educational Kit

Experiment with solar energy - the energy source of the future. Our solar educational kit lets you build your own solar models.
Suitable for ages 8+.

The kit comes complete with:
• Solar cell module
• Solar energy booklet explaining the why & hows of solar energy
• Small DC motor
• Screws and nuts
• Wire with motor clips
• Colour spinner discs
• Paper aeroplane and bird models
• Plastic turntables with 4 sizes, 5/8", 1", 1.5" and 2"

6-in-1 Solar Educational Robot Kit

A hands on experience in the world of solar power. This kit includes all the parts needed to construct up to six different projects. Choose between a robot, helicopter, plane, windmill, water skies or even a three wheeler! Don't even worry about screws, everything snaps together for easy assembly and its all solar powered so no batteries are required. For the best results, use it in direct sunlight. For cloudy days use a 50W halogen light. Suitable for ages 10+.

"T4" Transforming Solar Powered Robot Kit

The basis of this kit is two moulded 'frames' of component parts reminiscent of a plastic model aeroplane kit - about 50 parts! It also has a small (40 x 25mm) solar panel, a tiny electric motor, gears, pinions, etc. It also includes decals. It can 'transform' between a T-Rex or Rhino beetle with moving legs and jaw, Robot with walking legs and moving wheels, and a futuristic miners drilling machine with moving drilling bit and wheels. You will probably need small diagonal pliers to cut out and de-flash all the plastic parts from the frame. Suitable for ages 8+.

Solar Powered 14-in-1 Robot Kit

This kit has so many included parts we don't have the time to count them, certainly at least 100 or more. Notable are a solar panel, solar powered electric motor boat hull components, gears etc. This kit can be transformed into 14 different functional robots, some of which admittedly are whimsical, but the kit itself is a fantastic learning experience: Mechanical, educational, scientific & solar physics skills are exercised. Best of all the kit comes with an assembly manual that is LEGO® like in the clarity of description. The manual itself runs to over 80 pages. This kit represents sensational value and is perfect for bright kids 10+ years. (A side cutter is really required to clip all of the parts out of the moulding frames - try TH1897). Suitable for ages 10+.

Crooke's Radiometer

A beautiful desk gadget or serious educational toy, the Crooke's Radiometer demonstrates that light has energy, and will turn its vanes even when illuminated by a torch. Despite many people thinking that the motion is caused by the impact of photons on the vanes, the Radiometer in fact operates as a heat engine, driven by the different temperatures of the black and silver vanes.

Hydraulic Cyborg Hand Kit

A fun to build hydraulic cyborg hand that simulates the movements of your hand and fingers. The three fingers and opposable thumb have adjustable joints, which enables you to pick up large objects like a bottle of water to smaller items like a pen. It can fit left or right hands of different sizes, and uses hydraulic mechanical power so no batteries are needed. This makes a great gift and can teach kids how hydraulic systems work. Step-by-step build instructions included. Suitable for ages 10+.

SHORT CIRCUITS

SHORT CIRCUITS VOLUME 1 - SECOND EDITION:

With Short Circuits Volume 1, we give the option of buying the book on its own, or together with the accompanying kit that contains the components for each of the 20-odd projects described in the book. Some of the exciting projects include a Police Siren, Electronic Organ, Sound Effects Unit, Light Chaser and a Solar Powered Radio (an inexpensive solar panel is optional and available separately). Of course, many more projects are included! Remember, no prior knowledge of electronics is needed and the projects are totally safe. This volume will teach constructors everything they need to get started in electronics and is suitable for ages 8+. Kits contain small parts.

• Circuit diagrams included for each project
• Safe 6 volt system
• Techtalk discusses circuit operation and is written in a clear, easy to understand language
• Component layout on the special breadboard is clearly illustrated for each project
• Fun characters introduce each project, explaining the projects use

Short Circuits - Volume 1
BOOK - SECOND EDITION (BJ8502)
Book only.
• Soft cover - 96 pages
• 205 x 275mm
PROJECT KIT (KJ8504)
The complete kit of parts available separately. This includes plastic baseboard, spring connectors and all components needed to complete every project in the book. No instructions are supplied with this kit as they come in the book which is available separately.
BOOK & PROJECT KIT (KJ8502)
Apart from the book, we supply the baseboard, plenty of spring terminals and ALL the components required to build every project in the book, INCLUDING the bonus projects!
• Additional hookup wire can be purchased (WH3025)
• 6VDC (4 X AA) batteries required

Some of the exciting projects that you can build from this book include:
• **Short circuit tester**
• **Police siren**
• **Sound effects unit**
• **Solar powered radio**
• **Computer type circuits**
• **Magic Eye light alarm**
• **Electronic organ**
• **Light chaser**
• **3 types of transistor amps**
• **And many many more**

SHORT CIRCUITS VOLUME 2: THIRD EDITION:

Once constructors have mastered the art of assembling a circuit with springs they will want to tackle projects that are more complex. The benefit of spring termination falls away once they get into projects that have over, say, 20 parts. In addition to this, projects that work on radio frequency, or RF for short, don't like springs as they start to act like little antennae all over the place! So it's time to graduate to the heart of modern electronics - the printed circuit board. This simple device fulfils the function of mounting board & circuit wiring in one. The critical element of success in printed circuit board - or PCB for short - assembly is good soldering. Soldering is not for 8 year olds but its fine if they are older or are under adult supervision. In Short Circuits II we teach the reader how to solder. We teach you a lot more as well:

• How to use a Multimeter
• What tools will be needed.
• What sort of workspace is needed
• How the circuit works (Tech talk)
• What to do next
• Making the circuit work in the real world

p.B82
9V battery to complete these projects.
SB2423

Short Circuits - Volume 2 - Third Edition
Once constructors have the basic skills and knowledge either from a School Design and Technology course, or tackling Short Circuits Vol 1, you can now have some real fun! With this book (and associated project packs available separately - see following pages) they can make such things as a mini strobe light, police siren, mini organ, a couple of powerful radio transmitters, an FM radio - even a 'Knight Rider' scanner!! All components are fully described and explained, along with tutorials on soldering iron and multimeter use. All projects are safe and battery powered.
• Soft cover - full colour 148 pages
• 205 x 275mm

SHORT CIRCUITS VOLUME 3 SECOND EDITION:

Like our Volumes 1 & 2 book, Short Circuits Volume 3 is sold independently to each of the 30-odd projects. Some of the projects constructors will build include a Guitar Sustain Unit, a Universal Timer, Car Alarm, Two Lamp Flasher plus many more! There's even a project that demonstrates how constructors can use your computer to interface to the real world via a computer's parallel port. Building the projects described in Volume 3 will provide constructors with the confidence needed to tackle more complex projects, such as those described in the various electronics hobby magazines.

• Step by step instructions show you how to assemble each project
• Techtalk explains the operation of each circuit in detail, to help constructors gain a thorough knowledge of the "Building Blocks" used in circuit design
• "What To Do Next" shows constructors how to modify or further improve your project
• Basic circuit theory is provided to increase constructors level of understanding

Short Circuits - Volume 3 - Second Edition
Each project contains a full technical description, with experimental changes to each circuit also explained. After constructors have built any or all of the described projects, there is no reason why they would not be able to successfully tackle any of the construction projects published in the electronics magazines. This book will end up giving them the knowledge and skill that will elevate them into a fully fledged constructor!
• Soft cover - full colour 128 pages
• 205 x 275mm

SC3 Project - Infared Remote Link

This can be used as a remote on/off or momentary switch.
• Kit includes PCBs, 9V battery and all electronic components
• Receiver requires 12VDC power
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+
PCB: 105 x 60mm	KJ8058	$36.90
Instructions	KJ8059	$3.50

SC3 Project - Simple Intruder Alarm

This simple design features a normally open and normally closed input, 40 second siren duration and triggered LED indication.
• Kit includes PCB, buzzer and electronic components
• 12VDC power required
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8060	$17.90	$15.90
Instructions	KJ8061	$3.50	

SC3 Project - Screamer Car Alarm

A more sophisticated alarm including entry/exit delay, flashing deterrent light, soft warning alarm and deafening internal siren. Thieves will make a hasty retreat!
• Kit includes PCB, siren and electronic components
• Recommended Box - UB2 HB6012 $8.90

	Cat.	Qty 1+	Qty 3+
PCB: 132 x 88mm	KJ8062	$39.90	$35.90
Instructions	KJ8063	$3.50	

SC3 Project - Light Chase

Dazzling display using 10 LEDs that appear to chase each other. Build for a shop, theatre or advertising display.
• Kit includes PCB, LEDs and electronic components
• 12VDC power required
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8064	$15.90	$13.90
Instructions	KJ8065	$3.50	

SC3 Project - Light Scanner / Chaser

An impressive display using 20 LEDs that chase forward and backward - just like scanners seen in space movies.
• Kit includes PCB, LEDs & all electronic components
• 12VDC power required
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8066	$21.90	$19.70
Instructions	KJ8067	$3.50	

SC3 Project - Really Bright Flasher

Attract attention with this bright halogen light flasher. The flash rate can be adjusted between 0.5 to 3.5 seconds.
• Kit includes PCB, 12V halogen lamp with base and all electronic components
• 12VAC power required - use MP3044
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8068	$29.90	$26.90
Instructions	KJ8069	$3.50	

SC3 Project - Two Lamp Flasher

Alternate flashing halogen lamps with an adjustable flash rate between 1 to 4 seconds.
• Kit includes PCB, two halogen lamps with bases and all electronic components
• 12VAC required - use MP3044
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8070	$39.90	$35.90
Instructions	KJ8071	$3.50	

SC3 Project - The Champ Amplifier

A cheap and handy amplifier that can improve low-level signal sources so they can be heard on headphones or a speaker.
• Kit includes PCB, volume potentiometer and all electronic components
• 12VDC power required
• Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+
PCB: 105 x 60mm	KJ8072	$22.90
Instructions	KJ8073	$3.50

SC3 Project - Universal Stereo Preamplifier

If the input signal to your amplifier is not sufficient you will need a preamplifier such as this one to boost the signal.
• Kit includes PCB and all electronic components
• 12VDC power required
• Recommended Box - UB3 HB6013 $5.20
	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8074	$17.90	$15.90

LEARN TO SOLDER KITS

KM1090

Amazing Wearable Badges & Electronic Dice Solder Training Kits

Now here's a great way to get started with soldering, learn a little about electronics, and end up with a really fun wearable badge or electronic LED dice at the end! This range of projects are brand new and designed exclusively by Jaycar. Each project is powered by a small CR2032 Lithium coin battery, and the badges include a lapel pin so you can wear it too.

Each of the designs has a different look and feel, while the electronics involved is slightly different in each one, so you'll learn more about electronics and how it works even if you build them all!

SKULL BADGE WITH ALTERNATING FLASHING LEDS

This decorative skull design uses a simple transistor circuit to make the LED eyes flash in an alternating pattern. You'll also learn to solder and have a great badge to show for it!
KM1090

KM1092

OWL BADGE WITH TOUCH-SENSITIVE LED EYES

You'll have a hoot with this fun kit. It shows you how transistors can be used to have a light finger touch light up LEDs! It's also a great soldering training tool.
KM1092

ROCKET BADGE WITH FLASHING LEDS

Blast off with this great project using the robust 7555 timer chip. You'll make the LEDs flash and have a blast soldering it together, while learning how timer chip can create alternating outputs.
KM1094

PIRATE BADGE WITH FLASHING EYES *Not illustrated.*

Solder me hearties! Bring Captain Jaycar to life and learn how the 7555 timer chip can create alternate flashing LEDs! You'll learn to solder it all together too.
KM1096

KM1094

ROBOT BADGE WITH TOUCH-SENSITIVE LEDS AND BUZZER

This great robot has a touch-sensitive pad which makes the buzzer and LEDs light up when you touch it. It'll demonstrate touch-pads and the powerful 7555 timer, as well as soldering techniques.
KM1098

ELECTRONIC DICE *Not illustrated.*

Tap the module on the table to generate a random number between one a six, indicated by the LEDs on the top! It's great to build and highly functional.

ELECTRONICS KITS & PROJECTS:

We are still making a surprising number of kits for printed magazine articles. This is especially so for past projects described in the venerable "Silicon Chip" magazine. You can identify these projects as the Silicon Chip logo will appear alongside the kit in question. Indeed, all kits shown have an icon revealing the original source magazine article, including recent kits from DIYODE magazine.

KIT BACK CATALOGUE:
We have also continued to expand our back catalogue of kits that we still have stock of at the Head Office but do not carry in stores. If you are looking for a kit of an old project, check out our website at **jaycar.co.nz/kitbackcatalogue** for a full list of these great kits.

A GUIDE TO KIT ICONS:

SIMPLE
These kits are straightforward to assemble, generally built in one session and will require some basic electronics knowledge and soldering skills. Most are battery or AC adaptor powered. They may not have enclosures (i.e."boxes") or front panels.

DETAILED
Similar to the above but basically bigger. They are either "short forms" of larger projects or are fully operational projects with enclosures, front panels, etc. A greater knowledge of electronics is required to understand their operation and "troubleshoot" if necessary.

COMPLEX
All big projects which by their nature are complex, require several sittings to complete and may require some mechanical assembly. A good knowledge of electronics and manual dexterity is necessary to ensure success.

240V POWERED
All mains kits have this logo. We do this because we feel it is necessary that only experienced kit constructors should attempt mains powered projects. It is generally a good idea to have a competent colleague check your work before applying power.

BATTERY INCLUDED
Batteries are included with the kit.

AUTOMOTIVE KIT
Kit is specifically designed for automotive (which could mean motorcycle, caravan or boat as well).

BUILD TIME
We understand that your time is valuable. We have therefore decided to provide you with an estimated build time for all our kits. Each kit includes a stopwatch logo that indicates construction time. We know that you will find this useful.

SMD COMPONENT
Kit involves soldering a SMD (Surface Mount Device). Suitable soldering iron for SMD soldering and proper handling techniques are required.

SMD COMPONENT PRE SOLDERED
Kit supplied with surface mount component already soldered onto the PCB

KWIK KIT
A low cost fast assembly range of kits. Kwik kits are a fully imported range that can be assembled in just one sitting, sometimes only minutes! All printed circuit boards are screened with a component overlay. The instructions assume component knowledge & the ability to follow simple schematic diagrams

GUARANTEE ON KITS

Most kits are successfully constructed with few problems. However, we recommend that if a kit builder does not have enough knowledge to diagnose faults, that the project should not be started unless assistance can be obtained. Unfortunately, one small faulty solder joint or wiring mistake can prevent a project from operating, which would take hours to locate and at normal service rates the service charge could well be more than the total cost of the kit.

If you believe that you may have difficulty in building a kit (which is simply a complete set of separate parts made up to a list provided by the major electronics magazines) and you cannot get assistance from a friend, we suggest you return the kit to us in its original condition for a refund under our satisfaction guarantee. Unfortunately, kits cannot be replaced under our satisfaction guarantee once construction has been commenced. However, should you find any faulty parts (only), we will gladly replace them under warranty.

AMPLIFIER & PREAMPLIFIER KITS

"Pre-Champ" Versatile Preamplifier
Refer: Silicon Chip Magazine July 1994

This tiny preamp was specifically designed to be used with the 'Champ' amplifier KC5152. Unless you have a signal of sufficient amplitude the 'Champ' will not produce its maximum power output. The 'Pre-Champ' is the answer with a gain in excess of 40dB, which is more than enough for most applications. You can vary the gain by changing a resistor and there is even provision on the PCB for an electret microphone. Use AM4010.

'The Champion' Audio Amplifier Kit with Pre-Amplifier
Refer: Silicon Chip Magazine January 2013

An amplifier and pre-amplifier combination for all those general-purpose audio projects. It uses the AN7511 audio IC to deliver 2W music power into 8 ohms from a 9 to 12V supply. Features low distortion, two inputs (mixed 1:1), over-temperature protection (auto-limiting), mute and standby control. Pre-amplifier is also suitable for microphones and electric guitars, and can be separated from the amplifier for individual use. Kit supplied with silk-screened PCB, heatsink and PCB mount components.
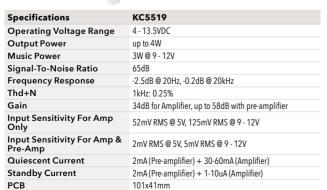

Note: Optional 10k ohm potentiometer for external volume control use RP7610

Specifications	KC5519
Operating Voltage Range	4 - 13.5VDC
Output Power	up to 4W
Music Power	3W @ 9 - 12V
Signal-To-Noise Ratio	65dB
Frequency Response	-2.5dB @ 20Hz, -0.2dB @ 20kHz

Clifford The Cricket
Refer: Silicon Chip Magazine Dec 1994

Clifford hides in the dark and chirps annoyingly until a light is turned on - just like a real cricket. Clifford is created on a small PCB and has little LED insect eyes that flash as it sings. Theremin Synthesiser Kit MkIII
Refer: Silicon Chip Magazine Jan 2018

Originally invented in 1919 using valve technology, and as featured on the soundtrack for the 1951 film "The Day the Earth Stood Still", the all "new" completely transistorised Theremin will give you a truly retro sound.

This kit is easy to build with everything incorporated into one circuit board. Also, most components, the switch, the pot and the power socket are mounted on the circuit board to eliminate messy wiring; the use of on board voltage regulation to suit an AC power supply eliminates the noise that results from modern switch mode power supplies; and it can also be powered by an external 12 volt battery.

We'll be honest, it is tricky to play and generally suits someone experienced with string instruments like a violin (Leon Theremin himself was a cello player), but with a little practice you can play some basic tunes, or just use it to make eerie sci-fi sound effects.

Build a Blue LED Cube 4 x 4 x 4 - Learn to Solder Kit

As described in the May 2020 DIYODE magazine

Build and marvel at your own programmable LED cube. This kit turns sixty-four blue LEDs, circuit board, a handful of components, and an Arduino® UNO compatible board (XC4410 sold separately) into an animated 4x4x4 LED cube. Once you have successfully soldered the cube together, plug it into your favourite Arduino® UNO compatible board and watch the LEDs alternate between fifteen different patterns. We also include instructions to program your own patterns. Tools and soldering required.

The 'Flexitimer'

Refer: Electronics Australia March 1991

Now in it's third revision by Jaycar, the Flexitimer uses a 555 timer coupled with a binary counter to create a simple and consistent timing circuit. In the original one-shot mode the timer will count up to the set point and switch the relay once. In the additional interval mode the timer will continue switching the relay at each recurrence of the set point. The circuit can be set at 11 time points with the minimum being 7 seconds and each step doubling the time to a maximum of 2 hours. Other times are possible by changing components C1, R1, and R2. Features of the third revision include a restarting the one-shot mode from an external switch or signal, a more energy efficient design, & space on the PCB for terminal blocks (not included).

Ideal for turning fans or heaters on at certain temperatures. This kit operates a relay when a preset temperature is exceeded and drops-out the relay when temperature drops. The relay included is capable of switching small currents only, so a larger relay or switching device should be employed if switching mains voltages or heavy currents. Ideal as a thermostat, ice alarm, hydroponics applications, etc. A small trimpot is used to adjust the cutout temperatures for the relay in the range of approx -30 to +150° C.

Universal +/- 15VDC 1A Power Supply Regulator

Refer: Silicon Chip Magazine March 2011

This is an upgraded version of the original universal power supply kit published in August 1988. One small board and a handful of parts will allow you to create either a regulated ±15V rail or +15VDC single voltage from a single winding or centre tap transformer (not included). Substitute different regulators to these supplied and you can alter the output voltage to your requirements. Upgrades in this design include improved parts layout and terminal blocks for inputs and outputs. Kit includes PCB and all components for 15 volt versions, transformer sold separately.
PCB: 72 x 30mm

Power Supply Options:
- ±15V rails from 15V AC plug pack (MP3059) or transformer (MM2002)
- ±15V rails from 30V AC centre tapped transformer (MM2007)

This Book Isn`t Safe - Colin Furze

In the words of YouTuber and Author Colin Furze: In my 10 years making crazy inventions and madcap projects on the internet I've been inspiring people young and old to get into engineering and take up a more practical life. So with this in mind I've teamed up with Penguin to create a book for kids that will carry this inspiration and help them work up to being confident with tools and materials that is the foundation of what I do.There will be 10 projects that get progressively more challenging for you to create at home that are low cost and need only basic tools. As well as these DIY projects the book will cover some of my favourite inventions with pictures and cartoons so even those that don't like a lot of words (my younger self) can enjoy this to the max. 192 pages.

Mastering Microcontrollers Helped By Arduino®

The aim of this book is not only to let you enter the World of Arduino®, but also to help you emerge victorious and continue your microcontroller programming learning experience by yourself. In this book theory is put into practice on an Arduino® board using the Arduino® programming environment. Having completed this fun and playful course, you will be able to program any microcontroller, tackling and mastering I/O, memory, interrupts, communication (serial, I²C, SPI, 1-wire, SMBus), A/D converter, and more. For this second edition, the author has designed a versatile printed circuit board that can be stacked on an Arduino® board. The assembly can be used not only to try out many of the projects presented in this book but also allows for new exercises that in turn provide the opportunity to discover new techniques.

This book is for you if you are:
- A microcontroller novice
- An Arduino® user (enthusiast, artist, etc.) wishing to deepen your knowledge
- An electronics graduate or undergraduate student
- A teacher looking for inspiration

Elektor Python 3 Programming and GUIs 2nd Edition

This is the second edition of a book aimed at engineers, scientists and hobbyists who want to interface PCs with hardware projects using graphical user interfaces. Desktop and web based applications are covered. The programming language used is Python 3 which is one of the most popular languages around: speed of programming being a key feature.The book has been revised and updated with emphasis on getting the user to produce practical designs with ease - a text editor is all that is required to produce Python programs.Hardware interfacing is achieved using an Arduino® UNO as a remote slave. A full description and source code of the communication interface is given in the book. The slave provides digital and analogue input and outputs. Multiple UNOs can be included in one project with all control code written in Python and running on a PCOne project involves a PIC microcontroller with code provided that can be loaded into the PIC using the UNO. The web applications and server are all implemented in Python allowing you to access your electronic hardware over the Internet. The Raspberry Pi computer can be used as your web server.An introductory chapter is provided to get you started with using Linux. The book is written for use with Debian or variations including Mint or Ubuntu. All of the programs in the book are freely available, ready to use and experiment with by way of a download from Elektor.

Universal Pre-Punched Experimenter's Boards

The low cost way to build prototype or one-off projects. We now stock 3 sizes of phenolic board that has a matrix of punched holes on 0.1" (2.5mm) pitch with 'donut' of tin plated copper around each hole. Finally the non-solder side of the board has an alphanumeric grid printed on it to assist in the component identification board layout.

Pressboard Insulation Material

Similar to Presspahn Elephantide®, this product is a heavily pressed craft-type board which is used as an insulator in mains products. It can be scored, folded and formed into many shapes, particularly into boxes or partitions to isolate mains circuits from fingers. It has good abrasion resistance and is often used in areas where chafing from vibration can occur.

Polymorph Pellets

Polymorph will change the way you make parts. It's a commercial grade thermoplastic that softens enough to be formed into any shape at around 62 - 65° C. You simply heat the pellets in hot water. It hardens at room temperature to form a tough plastic material similar in consistency and colour to nylon. It can be drilled, sanded, ground, machined, painted or heated and reformed again and again. Endless uses in model making, craft, single part manufacture, prototyping, engineering, science, lab and more.
- Supplied in a 100g bag of 3mm pellets.

Press 'n' Peel Film

This is by far the easiest way to make Printed Circuit Boards from CAD software or magazine PCB layout artwork. You simply make the PCB image by putting a Press 'n' Peel sheet of transfer film in the paper tray of a photocopier or laser printer (The sheet size is almost the same as the A4 paper tray). You then print or copy the PCB track image onto the film. Using a domestic clothes iron you press the image onto a precleaned piece of copper clad PCB. The image transfers to the copper and the image will not etch away. Ammonium persulphate or ferric chloride are both OK. You get 5 sheets of 215 x 280mm transfer film in each pack. Full instructions are supplied.

4 Easy Steps:
1. Print or Copy
2. Iron on
3. Peel off
4. Etch

Conductive Carbon Grease

Lubricates and improves electrical and thermal connections between sliding surfaces, while providing protection from moisture & corrosion. Excellent for use on switches and EMI shielding applications. Industrial, trade and hobby use. 50 gram tube.
• Prevents normally closed switches from corroding in place
• Reduces make-break arcing and pitting of switch contact surfaces
• Improves the connection between irregular or pitted contact surfaces
• Reduces EMI noise by maintaining a continuous path between conductive surface
• Thermally stable up to 200°C
• Density: 2.7 g/ml
• Electrical resistivity: 117 ohms/cm

Precision Conductive Ink

This is a highly conductive polymer for use in a variety of applications and is an indispensable tool for fixing damaged circuit board tracks. Apply instant traces on most surfaces (epoxy, glass, plastic, metal). Draw traces on circuit boards, repair defective traces, make jumpers and shield electronics, design prototype circuits and repair rear-window heater traces.
• 1mm track trace width
• 0.02 Ohm per mm resistivity
After heat curing only. Use low temperature soldering (less than 180°C/350°F) for not more than 5 seconds. Use low temperature soldering iron.

ANTI-CORROSION

Tef-Gel Anti-Corrosion, Anti-Seizing, Anti-Galling Syringe

This product is far superior to a similar product we sold last year. Its main use is to prevent dissimilar metals when fastened together from corroding due to galvanic action. For example, you fasten down a stainless steel sail track slide to the metal deck of a yacht; you use this product to prevent dissimilar metal electrolytic corrosion. That's all the other product was good for. This product also stops rotating objects from seizing and prevents galling in stainless steel screw fasteners. It also protects electrical terminals/connectors.
• Will not cold flow or dry out
• Is resistant to salt water and detergents
• Has an indefinite shelf life
• Contains PTFE (Teflon®) and NO (0%) volatile solvents, no silicone, or petroleum solvents. Nothing to evaporate
• It is dielectric (Non-electrical conducting)
• No known hazardous ingredients
• High flashpoint
• Non toxic

SOLID STATE RELAYS:

Solid state relays are particularly useful when only low switching currents are available, such as those presented by CMOS or TTL circuits. Optically isolated for optimum safety, these relays use solid state components rather than mechanical switches. AC types offer safe and easy switching of 230V mains.

PCB Mount Solid State DIL Relay

Able to be triggered from low currents, and a super small package. Low on resistance and very low quiescent current.

Note: D.C. only not A.C.

RELAYS

SOLID STATE RELAYS CONTINUED

Chassis Mount Solid State Relays, High Current
Both look similar but are in fact quite different.

SY4084 40A, 240VAC TRIAC Type
This unit has a dielectrically isolated D.C. control input that controls a 40amp TRIAC. This means that you can control AC mains up to 40A RMS. It also means that it will not control D.C. For that you need the SY4086 below.
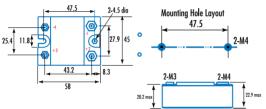

Specifications for SY4084
- Dielectric isolation rating 4000VAC
- Opto isolated control, 4V min, 32V max (D.C.)
- TRIAC controlled AC out. 48-280VAC
- Built-in snubber
- RoHS compliant

SY4084

SY4086 100A, 0-30VDC MOSFET Type
This unit has a dielectrically isolated D.C. control input to switch a MOSFET which can control loads of up to 100A @ 30VDC. It will not switch AC. To switch AC use the SY4084. NB: Mechanical details same for both units. Advantages of SY4086. Switching high current D.C. was previously accomplished by high current contactors. Contactors quickly wear out plagued by arcing of the actual contacts. There is no arcing with MOSFETS and their very low ON-resistance (in this case 3.5 milliohms) ensures little wasted energy.

Universal LED Flasher Relays

Specifically designed to work with replacement low current LED indicator lights which may "hyper flash" when used with your cars standard flasher relay. This high frequency flashing will burn out the globe quicker. The minimum load is negligible (0.02A). Some cars will even display a burnt out bulb indicator even though it's working fine, this unit will remedy that issue.

• Nominal voltage: 12VDC
• Operating voltage: 11VDC-15VDC
• Flashing frequency: 90 times/minute +/-10%
• Silent operation
• Dimensions: 40(H) x 28(W) x 28(L)mm

Tech talk

CONVERTING TO A LATCHING RELAY

How to turn an ordinary relay into latching type!
Sometimes you want to energise a relay to stay "on" instead of only momentarily staying on. For example you may want to make an electric motor, or a solenoid to stay on for some time.
You can do this with the circuit shown.
The key to this is a momentary push button switch (there are many in this catalogue.)
Pressing the push button switch (S1) activates the relay and closes the N O (Normally Open) and COM (Common) contacts. These contacts form a parallel connection across S1. Even if S1 is now opened, the relay will stay ON, or "latched."
To turn the relay off, you must interrupt power to the coil, in other words, switch V+ off, even momentarily. Even if you switch V+ on again, the relay will remain off, until you push S1 again.
Note: While the relay is energized, it will continue to draw coil current. True mechanical latching relays do not do this.

REMOTE CONTROL RELAYS

Multi Channel Remote Control Relay Boards
Add remote control functions to a new project or existing installation with these handy remote control relay boards. Available with 2 or 4 channels, each output relay is controlled by a separate button on the key fob controller. Each channel can be set to momentary or latching mode allowing you to customise the setup to suit your application. Operating on the robust 433MHz band the key fob remotes work over distances up to 40m and feature rolling code transmitting for added security.
• Selectable momentary or latching mode for each channel
• Transmission frequency: 433MHz
• Transmission range: 40m max
• Operating Voltage: 12VDC
• Relay contact rating: 28VDC 10A max / 250VAC 5A max

Wireless 4 Ch Relay Receiver (12V Nominal Operation)
This unit, which can be operated with the 2 x remotes (supplied), will control up to 4 x relays in Normally Closed or Normally Open configuration as either Momentary or Latched operation (the relays are built-in to the receiver). The relay contacts are rated at 5A at 14VDC. If higher voltage or higher power (or both) switching is needed, simply get these relays to operate a higher power relay. Strictly speaking for simple control applications, the LR8824 is all you need.

Specifications	LR8824
Power Input	10 - 15VDC
Current Draw	350mA max
Standby Current	<10mA
Transmission Distance	30m typical (300m+ max line of sight)
Transmission Frequency	433.92MHz
Transmitter Features	SAW locked, rolling-code, water-resistant.
Learning Capacity	250 remotes per module.
Outputs	4 x NO/NC contacts individually selectable as momentary or latched
Relay Contacts	5A max at 14VDC
Receiver Dimensions	68(H) x 60(W) x 25(D)mm, Antenna 1 50mm long when deployed

ADDITIONAL WIRELESS RELAY TRANSMITTER UNIT
Capable of controlling the LR8824 with up to 4 control voltage inputs. You could, for example, have an input on channel 1, which would be from say a micro-switch connected to a window or a gate in a shed or barn. The LR8819 will transmit a signal (100m minimum, up to 400m line-of-sight) to the LR8824 to raise an alarm. It will also accept USB type voltage signals etc. It will accept positive or negative voltage commands (it will operate without the remote controls). Essential for fixed system monitoring.
• Unit measures 68(H) x 60(W) x 25(D)mm
• Antenna is 150mm long when deployed

CERAMIC FUSES - 25 X 6MM

Ceramic Fuse 25 x 6mm Fast Blow

The range of BS1362 compliant fuses is designed to suit fused British power plugs. There's lots of other equipment that won't take an M205 or 3AG fuse, and this 25mm fuse lies in the middle of the range.
• Ceramic fuse with nickel-plated end caps
• 6000A interrupting capacity
• Four ratings available: 3A, 5A, 10A and 13A

BLADE FUSES WITH FAILURE LAMP

Not your ordinary blade fuse, these have an integrated lamp which illuminates the moment the fuse blows. This makes finding that blown fuse a cinch, especially when the fuse is in a hard to get location, like under the car dashboard. They don't cost much either, so they are a very worthwhile investment.

WIRE TAPPED BLADE FUSES

Double Blade Fuse Socket Wire Tap

If you've ever wanted to install 12VDC devices near or around your dash but have been put off by the need to manually install new wiring and run it into your engine bay this is a great solution. Simply plug the fuse into a socket in your fusebox and you'll have an instant 12VDC power source. A great way to power headrest monitors, extra internal car lighting, gauges, and more. Outputs to a female bullet crimp connector.

Available in standard, mini and micro blade fuse models.

CIRCUIT PROTECTION

CIRCUIT BREAKERS - BLADE FUSE SIZE

A blade fuse that doesn't need replacing! This range of mini and standard size Blade circuit breakers is designed to directly replace standard or mini blade fuses. No need to fumble around in the dark looking for the blown fuse or to dig around in the toolbox for a suitable replacement. Choose between manual or automatic reset types. The manual type suit 12V-24V systems and trip once the current is exceeded, and allow you to fault find the circuit before resetting. The auto reset type suits 12V systems and will re-establish power to the circuit once the current returns to normal levels. Available in Mini or Standard size, and come in similar colour coding to standard blade fuses.

High Current DC Circuit Breakers
Moulded in black electrical grade bakelite, these rugged and reliable devices allow you to simply reset rather than find another expensive fuse. They can be used as an occasional circuit isolation switch. Two popular current ratings. Both units have the same physical dimensions. Ideal for car sound installations. Operating voltage is 12 to 14VDC. Each device will trip within a few milliseconds under short circuit conditions and feature protective rubber caps, test button and gold plated 5mm dia. terminals.

70A 12-14VDC

Will trip within 1 minute at 90A load. Will trip within a few milliseconds under short circuit conditions. Supplied with 5mm dia gold plated terminals with captive shakeproof washer and provision for up to 1/4" mounting bolts. Protective rubber caps for terminals. Test button on top of unit enables circuit breaker to be used as switch circuit restored with simple lever action.

SF2265

100A 12-14VDC

Will trip at 110A or immediately under short circuit conditions.

Heavy Duty Panel Mount Circuit Breakers
A range of heavy duty and high quality panel mount circuit breakers. The reset switch on these units are high grade and will not fail in short period unlike other units in the market. It has a protective plastic cover to prevent accidental shortage. Incorporates multi-wire gauge inputs and outputs, they are perfect for high end car audio installations, automotive wiring or solar installations. Terminals are platinum plated.

PCB Mount Thermal Circuit Breakers (SPST)

Miniature auto-resetting thermal type units that solder directly into a PCB.
- Ideal for protecting power supplies, amplifier output transistors, appliances etc
- Slow response time is ideal when capricious tripping would be a nuisance
- Judicious selection of breaker rating will ensure protection without unnecessary tripping

SF2281   SF2284

Marine Grade Illuminated Switch Panels with Circuit Breakers

An economical solution to controlling multiple DC circuits on your boat, or any other application where you want to switch multiple DC circuits. Each switch panel is an attractive moulded ABS plate, with high quality 10A rated illuminated rocker switches and re-settable circuit breakers on each circuit. Power is supplied on a common rail to keep wiring neater, and wiring connections are made with standard spade terminals.

Two versions available:
4 WAY CAT. SZ1902
- Dimensions 110(H) x 100(W) x 45(D)mm

IP66 Marine Switch Panels with Circuit Breakers

These units feature the attractive tactile rocker switches that are common on luxury Australian and foreign made motor cruisers. The panels have Butyl rubber gaskets and IP66 water resistant rated switches and circuit breakers, making these switch panels suitable for an exposed environment. They are pre-wired as much as possible, with wiring connections made via standard spade terminals for ease. Both require about 80mm of space behind the mounting bulkhead. The 4 way has 6,10,15 & 20A rated circuit breakers and the 6 way has 6,6,10,10,15 & 20A breakers, and the switches feature LED illumination to let you know which circuit is active.

CIRCUIT BREAKERS CONTINUED

Anti-Tamper 4-Gang Switch Bank/Circuit Breaker

This switch bank consists of a gang of 4 x 16A/12VDC circuit breaker rocker switches pre-wired with protective translucent panels to discourage naughty fingers tampering with them. The rockers act like switches but will behave like a circuit breaker if any circuit pulls more than 16A. They would typically be used to power all sorts of things while under way which should not be turned off.

Each translucent panel has a recess to accept a permanent sticker annunciating the function of the switch. A sheet of decal annunciators is supplied with 45 (yes 45) labels. These range from "Bilge Pump" to "Deck Wash", to "Fridge", "Macerator Pump", "Radar", "VHF", etc. Front dimensions of the panel are 130(W) x 50(H)mm. Approx. 40mm is needed behind the panel for wiring access. 2 x No. 8 countersunk screws are supplied.

POLYSWITCHES

PTC Fuses - Circuit Protection

Polyswitch protectors are based on conductive polymers and act like resettable solid state circuit breakers. When the operating current of the protector is exceeded the interior of the device partially melts, which increases the volume increasing the resistance drastically. This in turn reduces the current. The device stays in this state while the current is maintained because its temperature is elevated. Once the current is removed, the device re-establishes itself almost immediately, so that the low resistance value is restored.

Free Boxes!
MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

THERMAL PROTECTION

Thermal Fuses

These devices go open circuit permanently when they reach their rated temperature. They are used extensively in 240V mains rated appliances including, heaters, fan heaters, curlers, hair dryers, toasters, etc.

NORMALLY CLOSED
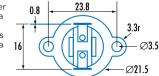

When the surface meets or exceeds a certain temperature the SPST bi-metallic element goes open circuit.
• The unit resets automatically when temperature falls below a specified limit
• Ideal for any electrical item that needs thermal protection

NORMALLY OPEN

These thermostat switches have normally open contacts. They operate once the temperature reaches a specified limit and automatically reset to their original normally open state once the temperate drops below its rated temperature. These are suitable for power amplifier applications and other temperature sensitive devices where a cooling fan needs to be integrated to cool the device down. Mounting holes are provided, ideal for attachment to a heatsink or any metallic surface.

ROCKER SWITCHES

INDIVIDUAL "CONTURA" STYLE DC ROCKER SWITCHES

These are the superb looking rocker switches that you have seen in the cockpits of the 70-100ft luxury motor cruisers recently. They would look great in your 4WD, RV, Caravan or any other application as well. The base switch supplied (rated at 12V 20A, 24V 10A) comes with a double-LED illumination (low in OFF, high in the ON position), a standard rocker cover and a standard range of decals to customise the switch to your application.

Typical decals are symbols for: windscreen wipers, horn, heater, etc; there are dozens of these decals included. Also available are a set of special laser-etched covers with the following graphic symbols to really create a professional finish. You need to buy the basic switch (in blue, white or red illumination) and then the custom cover (if required).

Modular Rocker Switch Brackets

Compatible with our Contura style switches, these brackets use a clever modular design allowing you to "stack" multiple rocker switches together into a single cutout. The end-cap piece works for either end, and you can put as many centre pieces in as you like. Also available in a single-switch mount. 100% interchangeable with the round-hole variant of these brackets - PS2806/PS2808 (See page B90).

Illuminated Blue Rocker Switch Panels

Straight forward installation and wiring, with just four connections - everything else is pre-wired! Then all you need to do is connect your various peripheral devices. Switches are rated at 20A for a 12V system (10A for 24V) up to a maximum 45A per panel. The LED illumination is powered separately, so you can run it through a switch or dimmer too.

FLOAT SWITCHES

Float Switch

VERTICAL OR HORIZONTAL MOUNT NO or NC. Ideal for
use in conjunction with solenoid valves, water pumps, etc.,
this float switch can be made NO or NC
(Normally Open or Normally Closed) by
the orientation of the float. Horizontally
mounted so the float falls, when the fluid
level rises it will switch ON at maximum
float height. Mounting the switch so the
float rises upwards when the fluid level
rises above switch height it will switch
OFF. Vertical mounting, with the float down,
will switch OFF at a high fluid level. Widely
used in marine, automobile, industrial,
agricultural fluid level sensing applications.
• 560mm wire leads
• 92.5(L)x 18(D)mm x M16
• Float Rise height: 40mm from centreline

Top Mounting Float Switch (Level Detector)

Ideal to control tank filling systems this vertical movement float switch fits
quickly to the lid or top cover of a tank or other container. A mere 20mm
travel distance for the float will trigger the switch ensuring you leave an air
gap and don't overfill the vessel. Contacts are closed when the float is out of
liquid and open when the float
is elevated.
• Dimensions: 70(L)x23(Dia)mm

LAMP STYLE PUSHBUTTON SWITCH

240V 2A Bed Lamp Style Pushbutton

Universal pushbutton switch suitable for replacing
switches in some equipment. Also commonly used in small
electronics projects such as school science experiments
due to ease of connection using screw terminals.
• 240V 2A rating
• Panel mounting hole: 10mm
• Maximum panel thickness: 2.5mm
• Pushbutton stem: 7(L) x 5(Dia.)mm
• Dimensions: 25(H) x 24(L) x 12(W)mm

INLINE DC SWITCH

Inline Low Voltage Switch

Simply connect your plug pack adaptor into this
handy in-line switch to provide quick and easy
on/off control. Much easier than unplugging the
connector or reaching for the power point when
you want to switch your device on or off. Fitted with
2.1mm DC plug & socket and rated at 24VDC at 2A.

DUAL SWITCHING

**This circuit enables you to turn a load on or off (typically lighting)
from either switch which may be a long way apart. The switches
must be single pole, double throw types, minimum (SPDT).**

**Note! Only a
qualified electrician
can perform this
wiring for 240V.
You can do it
yourself for low
AC or DC voltage
wiring.**

SPST 24V 15A Sealed Toggle

This large toggle switch is specially designed for marine conditions. A weatherproof rubber boot covers the actuator, and the switch mechanism is encapsulated in rubber. For this reason, 150mm fly leads are attached instead of the usual terminals. Not only limited to marine use, it can also be used as an ultra-durable switch in many applications.
• Ideal for marine or automotive use

DUAL SOUND PIEZO INDUSTRIAL TYPE

Similar to SONALERT® earpiercing sound. Non inductive, operates from 1 - 13VDC. Now with both continuous tone and pulsed tone. Red & black for continuous, yellow & black for pulse tone. Ideal for most signalling applications.
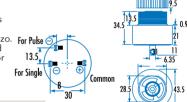

Specifications	AB3456
Operating Voltage	1 - 13VDC
Rated Voltage	12VDC
Current	Single tone 35mA, pulse 20mA
Frequency	2.9kHz

4kHz Audio Transducer

This electro-acoustic transducer contains no electronics making it a versatile component for electronics projects. Apply an AC voltage input to the wires and it will generate sound pressure waves based on the frequency. Connect the wires to a ciruit input and it will generate an AC voltage when stimulated with a sound pressure wave making an efficient knock or vibration sensor.

Supplied in a black plastic casing for easy mounting it can also be deconstructed to suit alternate applications.
Without a doubt this is one of our most popular components for a multitude of electronics projects.

• Resonant frequency: 4kHz +/- 0.5kHz

Fan Assisted-Type Heatsink

This heatsink is designed to mate with itself to form a tunnel. The heatsink extrusion has a screw flute centre to enable 4 x No.6 self-tapping screws to fasten an 80mm standard type fan on one (or both) end/s to drive air through the heatsink assembly. It is ideal for high power amplifiers and power supplies. The entire assembly, including fan/s can still fit inside a 2 x Rackunit (88mm) enclosure. The heatsink also features ribbed fins for extra surface area, a 4mm thick base to enable thread tapping and small vee grooves on 5mm centres to facilitate mounting hole location. The centre groove, for example, is directly below the middle fin.

- Two standard lengths are available, black anodised

Thermal Transfer Tape 100 x 100 x 0.5mm - Pk 2

When it comes to attaching devices like star LED modules to heatsinks, it's often not easy because they don't have screw 'eyes' like a TO220 transistor package. Using this thermal transfer tape, it's a breeze. The material is self adhesive and provides good thermal conductivity making it easy for chipsets, LED modules, memory modules etc. 2pcs of 100mm x 100mm sheets supplied. Just cut to size. 0.5mm thickness.

12VDC MAGLEV FANS
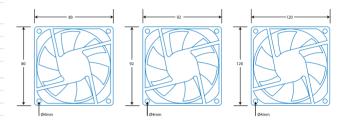

Super Long-Life Low-Noise MagLev Bearing Case Fans

Featuring a patented Nanoflux bearing that incorporates magnetic levitation (Maglev) technology and precise manufacturing, these premium quality fans ensure an extremely long operational life of 100,000hrs at 40°C (even longer at 25°C). Not only does the unique self-lubricating Maglev bearing design offer extremely long life, but also extremely low noise levels compared to traditional fans ball bearings, and also offers the ability for the fan impeller to be removed for cleaning. The fan impeller itself has a winglet tip design and is UV reactive. Rubber fan mounts are also included to eliminate fan motor vibrations entering the case, further reducing noise levels. Dust/waterproof to IP54, these fans are sure to last even in harsh conditions.

- Voltage: 12VDC (5VDC Starting Voltage)
- Black: Earth, Red: 12V+, Yellow: Tacho output (1 pulse/rev)
- Bearings: Nanoflux magnetic levitation
- Housing: Polycarbonate
- Impellers: UV reactive polycarbonate

Jiffy Boxes
Manufactured from ABS plastic, these jiffy boxes not only look great, they have been designed to incorporate everything our customers wanted in a constructor's box. Sizes are compliant with industry standards externally and PCB fitting internally.
• Impervious, dimple-free finish provides good adhesion for screen printing
• Lids feature a 5mm grid of 'centre punch' type points on the underside for quick & accurate drilling
• Lids also feature a 10mm grid of scribed lines providing an easy and precise guide for cutting or filing cut-outs
• PCB guides in the sides of the box have snap-in locators. Eliminates the need for stand-off hardware when mounting boards horizontally
• Box also has a grid of 'centre punch' type points on the base of the inside
• Supplied with lid fixing screws

IP65 Sealed ABS Enclosures

- Made with ABS material
- Moulded in dark grey
- Operating temperature: -20°C to +80°C
- Bosses on internal base allow fixing of PCBs horizontally, or connection of terminals etc
- The lid and base incorporate a tongue and groove sealing system with a neoprene gasket
- Lid fixing screws are M-4 stainless steel (non-magnetic) into threaded brass inserts
- Wall mounting holes and lid fixing screws are outside the sealing area thus preventing the ingress of moisture and dust
- Some sizes also available with external flange to allow mounting after the box has been sealed
- Designed to IP65 of IEC529 and NEMS 4 (dust and hose proof)
- Internal guide slots for mounting PCB assemblies vertically (Not on HB6120 or HB6134)

IP54 High Quality Polystyrene Enclosures

This range includes a small flat case that is ideal for remote control transmitters, up to a case that is ideal for bench test equipment, and the best thing is that they are not expensive.

All are supplied with removeable front and rear panels which are light grey in colour, with the rest of the case dark grey. They are moulded in ABS, conform to IP54 and IEC529 and NEMA4 with respect to moisture and dust proof sealing and flame retardant to UL94-VO.

Guide slots are provided for vertical mounting of PCBs, and spacers are moulded in for horizontal mounting.

All but the smallest two have M3 screws and brass inserts to hold top and bottom together.

Grey Vented ABS Enclosures
A range of vented ABS enclosures to protect your project from unwanted fingers or objects making contact with your electronics, but still allowing for airflow (or moisture for environment sensor applications). The enclosures are moulded from grey ABS plastic and have a satin textured finish. Four moulded standoffs hold your circuit board in place (screws not included - use #2 x 3/16" or similar), and slots in the base makes it easy to wall-mount the enclosure. Wiring can be easily passed through by knocking out a small round section in its base with a screwdriver. The snap-fit assembly makes it easy to close or open the enclosure without the need for tools.
• ABS plastic with UL94-HB rating
• Satin texture finish
• Designed to meet IP30
• Grey in colour

SPECIALITY PLASTIC ENCLOSURES

SPECIALTY PLASTIC ENCLOSURES

Sealed Polycarbonate Enclosures - IP65

- Made with Polycarbonate material - moulded in light grey
- Operating temperature: -40°C to +125°C
- The lid and base incorporate a tongue and groove sealing system with a neoprene gasket
- Lid fixing screws are M-4 stainless steel (non-magnetic) into threaded brass inserts
- Wall mounting holes and lid fixing screws are outside the sealing area thus preventing the ingress of moisture and dust
- Designed to IP65 of IEC 529 and NEMA 4 (dust and hose proof)
- Internal guide slots for mounting PCB assemblies vertically (not on HB6230)

Professional Bench Enclosure

This cabinet has pre-punched ventilation holes, metal thread fastening screws, aluminium prepainted front and rear panels, up to the minute styling and facilities to mount internal hardware without recourse to drilling lids. Apart from this, the enclosure features cabinet heights that comply with standard IEC297 rack heights. Even though it is not a rack cabinet many components (especially transformers) are made to comply to these height dimensions.

METAL ENCLOSURES - DIECAST

IP65 Sealed Diecast Aluminium Boxes

This range of boxes compare in quality to those English and Canadian ones that are VERY expensive. These are ideal for housing electronic assemblies, pneumatic, hydraulic & electrical devices for commercial & industrial environments. Provides effective shielding of EMI and RFI.

- Aluminium diecast - resistant to atmospheric and marine corrosion
- Designed to IP65 of IEC529 and NEMA4 (dust and hoseproof)
- Wall mounting holes and lid fixing screws are outside the sealing area
- The lid incorporates a recessed neoprene gasket
- Bosses on internal base for fixing PCBs horizontally or connection of earth grounding, etc
- Internal guide slots for mounting PCB assemblies vertically
- Screw holes for lid mounting are roll threaded
- Captive, recessed lid screws
- Heat rating up to 400°C

TRANSFORMERS
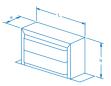

pick me — QUICK REFERENCE TRANSFORMER SELECTION

Magnetic core technology for mains transformers has been stable for many years. This is not to say that manufacturing technology has not improved. Our range of transformers may be stable, but that does not mean that our products don't change. We are constantly refining these transformers. We have two major categories Power El Core and Power Toroidals. This table gives an overview with key technical Specifications for easy reference and selection.
• Primary Voltage (V): 240VAC   • Primary internal thermal fuse protection
• Conforms to AS/NZ 61558.2.6

TOROIDALS: WHY A TOROID?

SOANAR

• Smaller size and weight to meet modern 'slimline' requirements
• Low electrically induced noise demanded by compact equipment
• High efficiency enabling conservative rating whilst maintaining size advantages
• Simple, quick, single bolt mounting

The Toroidal transformer is now accepted as the standard in the industry, quality made to ISO 9000 overtaking the obsolete laminated type. Industry has been quick to recognise the advantage toroidals offer in size, weight and lower radiated field. Current ratings on toroidal transformers. Can be used in 2 ways:
A) Both secondary windings in series - double the volts
B) Both secondary windings in parallel - double the amps.
Note: If connected in parallel, the windings must be connected in phase.

40YRS OF TRANSFORMERS

SPEAKER TRANSFORMER

5W Line Speaker Transformer
Designed to tap 100V (or 70V 1/2 power) public address amplifier lines to use an 8Ω speaker. Made with grain oriented steel for good frequency response. Good dynamic range. Primary taps enable you to select power level for 8Ω speaker. Connect primary to C (100V) and tap for whatever sound level is required from 0.5-5WRMS. Supplied with terminal block mounted on top of transformer. Mounting hole centres 53mm.

BOOKS

Build Your Own Coils and Transformers Book
This book is a wealth of information, ideal for a hobbyist or anybody interested in winding their own transformers. After the introduction the book covers attributes of coils/transformers, mutual inductance, reactance, resonance, impedance, coil selectivity. It then goes on to the design aspects - discussing coils in tuning circuits, types of formers and cores, types of winding, self capacity, equations, coil design, design of IF transformers then output and power transformers. 55 pages 137 x 212mm.

QUALITY MATTERS

We often overlook the hardware that connects our appliances, our speakers, or feed our movie streaming from the router to the TV.

Often considered unsightly, with much effort to conceal them, there's much more than meets the eye to the humble length of cable.

Especially in today's electrically noisy environments, quality makes a difference. That's why you'll find such a huge range of cable, and associated connectors.

There are budget options for those less sensitive projects, through to the most premium cable and connectors for the discerning audiophile or performance critical application.

We've been selling quality hardware in this space for 40-years. We know what works, so you can trust our products, unreservedly.

SPEAKER CABLE

SPEAKER CABLE - BY THE METRE OR ROLL:

Everyone, at some stage of their life, needs to run a length of wiring to set up a speaker or two. Yes, you may be able to cobble some mains fig.8 flex to do the job - but really, let's get serious. The Jaycar range of speaker cable goes from quite modest to gi-normous! At the modest prices shown below, why not just use the right stuff - with polarisation to boot - to get that job done, neatly & efficiently. Oh, and if you find yourself doing speaker wiring jobs a fair bit, you may be better off buying a spool. It's always there when you need it.

WHY OUR WIRE IS TINNED

We now supply all multi-strand power cable with the copper conductors tinned. When you put a coating of pure tin over the copper, you prevent the copper from oxidising. This oxidising can prevent you from achieving a good, tinned solder connection to the wire. This is particularly important in marine and car installations. We have not increased our price to you for this step up in quality.

BANANA CONNECTORS

BANANA PLUGS

Banana plugs & sockets originally started life on test equipment. Their versatility quickly saw them as output connectors for power supplies. When they were integrated with binding posts they quickly saw use as speaker connectors. Now they are everywhere.

Banana Plugs
Plugs - Piggy Back

With this quality piggy back style, another banana plug can be inserted into the back of the plug.

XLR - AMPHENOL® PLUGS & SOCKETS

Typically used for balanced connections such as professional microphones; these connectors are 3 pin & lock on to the socket. The confusion over whether pin 2 or 3 is hot has only relatively recently been resolved. The Standard has been defined by the Audio Engineering Society which we have outlined on the bottom of the this page. Amphenol® have taken over the genuine Cannon brand.

Tech talk

XLR WIRING

The Standard is defined by the Audio Engineering Society in AES14-1992(r1998)
Pin 1: Shield/Ground
Pin 2: Hot/in Phase / +
Pin 3: Cold / Out of Phase / -
To create an unbalanced connection, pin 1 & pin 3 are connected to ground & pin 2 carries the signal.
Note that there is a lot of equipment (particularly in the US) that has pin 2 & 3 designations reversed (i.e. 3 hot, 2 cold).
Manufacturers are adopting the Standard on all new equipment.

DIN PLUGS & SOCKETS

DIN Plugs & Sockets
Originally a German standard, these connectors are available in versions from 2 to 13 pins. Once widely used, these are now seen less on AV equipment. The 2 pin version is used for some loudspeakers and 5 pin version is still used for connecting MIDI electronic musical instruments & older PC keyboards.

F-Type Type screw-On Plugs
These are ideal crimpless but strong F-plugs for low volume applications. Highly recommended. Simply strip coax back about 12mm, fold braid/foil back over the plastic outer sheath. Trim about 8mm of foam insulation from centre conductor. Then simply screw the knurled connector on the cable until you see sufficient centre conductor out of the front of the connector.

HEADER CONNECTORS

0.1" (2.54mm) Locking & Polarising Header Connectors

A range of connectors for mating cables to PCBs. The connectors are polarised and locking for accurate and secure connections from 2 way to 10 way. The male PCB headers are available in both right angle and vertical orientations. Socket contacts are formed from tin plated brass that can be soldered or crimped.

• 2.54mm pin spacing
• 0.9mm PCB drill hole

Suitable crimping tool for 0.1" header sockets is our Cat. TH1834.

"Jow" Cable Clamp Connectors

Simply insert your wire into the clamp opening and snap it shut using your hands or small pliers depending on wire gauge to make the connection. The precision-sharpened connector blades borrows the IDC configuration that cut through the wires create a connection. Available in two shapes - "I" type and "T" type. "I" type are used for end to end connections whereas the "T" type for parallel connections. Ideal for applications such as: low voltage LEDs, residential, automotive, communication and broadcasting.

• Avoid stripping, twisting or crimping cables together eliminates need to tape cables
• Creates an IP33 connection
• Electrically Safety approved
• Handles up to 600VAC
• RoHS compliant

HEADER/ TERMINAL BLOCKS - PCB MOUNT

PCB Spring Terminal Blocks

These PCB terminal blocks retain the wire securely by a spring type clamp. The wire is held very securely but can be quickly released by depressing a release lever. The wire can be inserted/released indefinitely with virtually no deterioration of the contact/spring assembly. Both 2 & 3 poles are available and the housing of each is dove tailed to stack together and make any number of poles.

• Pitch: 5.0mm
• Housing material: PA66
• Contact/spring assembly: Stainless Steel
• Will accept wires from 22-14AWG

CRIMP LUG & TERMINALS

SELF SEALING QUICK CONNECTORS

Spades, Eyes, Forks, Butt & Bullets

The unique heat sensitive sealing gel in these quick connectors will automatically flood the crimp joint with sealant as the heat-shrink sleeve is heated. The resulting crimp connection is water and corrosion resistant and has good strain relief properties. 11 styles to choose from.

BUS BARS

8 Way 100A Machined Brass Bus Bar

These are usually used to give an electrically common point for earth wiring but are also useful for low voltage tie points, especially on boats or RV's, Caravans etc., 6 holes accept up to a 4.5mm wire bundle and the outer 2 a 6.0 bundle. The Bus bar has insulated standoffs at each end which can be removed so that the assembly can be screwed directly to a chassis. The standoffs have a conservative insulation rating of 1000V.

Do not use either SZ2003 or SZ2012 for 240V

• All screws M4.0 Brass bar 9.0 x 6.0
• Length overall including standoffs: 100mm, without standoffs: 65mm

10 Way 150A Insulated Bus Bar

This quality bus bar features a raised insulating base that isolates the bus bar from earthed or other live chassis. It features 2 x 5mm bolted terminals for connecting main power feeds, and 10 screw terminals for connecting lower current feeds of up to 10A each. Total current capacity is 150A, and is suitable for 12-32V wiring. 2 countersunk screw holes for 5mm metric fasteners.
• Not suitable for 240V active circuit
• Dimensions: 145(L) x 30(W) x 40(H)mm

Expandable PPS Sleeving
This PPS (Polyphenylene Sulphide) monofilament sleeving is ideal in high temperature environments and offers a lightweight mechanical protection to your cabling. The construction expands up to 3 times to allow easy insertions of cables and reverts back to original diameter for a snug fitment. The open weave design also dissipates heat and doesn't trap moisture.

CABLE MANAGEMENT

HEATSHRINK ACCESSORIES

Solder Splice Heatshrink Tube

Solder splice heat shrink tubes allow you to quickly join two cables thanks to the small section of solder in the middle of the tube. Simply slide a tube over the join in two cables and heat as you would any other shrink tube. As the tube shrinks the solder melts to electrically connect the wires resulting in a join which is reliable and well insulated. Available in four sizes approximately 26-40mm in length with 5 pieces per pack. Shrink ratio 2:1.
• Minimum shrink temp.: 85°C
• Starting temp. of solder melt: 140°C
• Operating temp.: - 55°C to 125°C
• Minimum full recovery temp.: 160°C

1.
Position wires into solder splice

2.
Tubing will shrink and solder will melt and flow through the shipped wires
Apply Heat

Carpet Cable Cover - Sold by the Roll or Metre

Conceal unsightly cords and eliminate trip hazards with this low profile cord cover. Its 'cut to length' flexibility avoids the constraints of similiar cord covers. Just lay it over your cords, and let the "hook and loop" technology on the underside do its job on your nylon based carpet to secure your cables in place. The channel along the middle allows you to reconfigure your set up without the need to remove any cords. Re-usable over 1,000 times, machine washable and a fraction of the price of other carpet cord covers. The ideal solution for any office, boardroom, meeting room or public space. Choose from black to keep cable runs discreet, or yellow to prevent people tripping over it.

CABLE GLANDS

IP68 Nickel Plated Brass Cable Glands
These nickel-plated brass cable glands are certified to IP68 and provide superior grip and sealing. They are totally protected and O-ring sealed against the ingress of dust, moisture and water to a depth of one metre. The unique design speeds installation and eliminates the need to disassemble the gland before fitting. A self-adjusting cable seal allows the glands to be used on a wide range of cable sizes and minimises inventory holdings. These glands are supplied complete with seals and locknuts. 5 sizes are available.

Releasable Cable Tie Pack
Releasable cable ties are perfect for temporarily securing cables or for jobs where you need to periodically change cables. This handy pack contains 10 pieces at lengths of 125, 200, and 300mm. The release lever is located below the head of the cable tie making it easy to access but unlikely to be released accidentally. The ties are made from UV resistant black nylon and have safe edges to prevent cuts.

Cable Tie Box - 400 Pieces
Let's face it, the mixed box of cable ties in all the colours of the rainbow is fine, however most of the time you only use about 2-3 different sizes and the black colour because of its UV stability. This is your box. This kit consists of: 100 pcs x 200mm, 100 pcs x 150mm, 200 pcs x 100mm. All in a see through flat storage case that makes access to the ties easy. The box even has some compartment dividers included so that it becomes a parts storage box when all of the ties have been used up.
• Box dimensions: 250(W) x 180(D) x 40(H)mm

Thread Repair Kits (Small Metric) M4 - M6
These products enable you to drill out a stripped or otherwise damaged thread in a blind hole. You can then insert a replacement thread with the coiled thread inserts and regain full function of the threaded hole, often giving a much stronger thread than the original one. This also works when a damaged stud or screw shaft has been removed.
- Includes: Drill bit, thread tap, insertion tool, tag punch and 10 inserts of the nominated thread size.

Three versions available.

DISCLAIMER All possible care has been taken in the preparation of this catalogue. However, specifications and particulars in relation to the products referred to in this catalogue are subject to change without prior notice. Some photographs contain samples which are representative only. Stocked item may vary in colour and look. Jaycar will not be held liable for any errors or omissions.

PRICES All prices quoted in this catalogue include Goods and Services Taxes (GST) and are current at the time of printing. So you can be confident of price stability. At Jaycar, we make every endeavour to maintain prices for the life of the catalogue. However, factors beyond our control (such as changes in foreign currency exchange rates, changes in base material costs etc.) may vary costs and we reserve the right to amend prices accordingly.

STOCK AVAILABILITY At Jaycar we are constantly seeking new products and due to the rapid developments within the electronics industry some products in this catalogue may become obsolete or discontinued during its life. In the event of this happening we apologise for the inconvenience and where possible will substitute a similar product of equal or better quality.

OUR RAINCHECK If your local Jaycar store has sold out of a currently advertised line, we will be happy to issue you with a 'raincheck'. When the stock arrives and you can buy the original item (or its comparable product) at the advertised price - even if the original promotion has ended. 'Rainchecks' do not apply to items that have been advertised as 'limited', 'discontinued', 'surplus' or 'clearance' ranges.

'CHANGE OF MIND' RETURNS Although not obligated to do so, at Jaycar we appreciate that you may have second thoughts about your purchases and will give a 'Change of Mind' refund if goods* are returned within 7 days (14 days for mail order and internet purchases). For 'Change of Mind' purchases, goods can only be accepted back for refund or exchange in 'as sold' condition including undamaged original packaging, complete instruction books, manuals, accessories, etc. If freight expenses of any type have been incurred, these are not refundable. We regret that any cash, credit card, or EFTPOS refunds over $999 must be refunded by Electronics Funds Transfer/Direct Deposit for security reasons. Jaycar does not provide credit notes. Your Sales Docket must accompany all returns.*Note: Refunds on 'Change of Mind' purchases do not apply to books, batteries, headphones, health products, semiconductors, computer software, all recordable media, some tools and non multimeter test equipment (including cathode ray oscilloscopes), step-down transformers (240-100V), some party lighting and associated products.

WARRANTIES Jaycar warranty period is 3 months from date of purchase, or such longer period as stated in this catalogue. Many products carry one year, two year, five year, or lifetime warranty or may qualify for over-the-counter replacement. These items are identified in the catalogue by the icons explained on page A4. If any defect in materials or workmanship in product sold by Jaycar is identified and notified to us within the warranty period then we will, at our discretion repair or replace the product. Jaycar does not accept any liability beyond this for consequential loss. Warranty is subject to us being satisfied that a defect was caused by defective workmanship or materials and was not caused by or was not substantially contributed to by other factors beyond our control, including (but not limited to) defective installation, maintenance, or repair; alterations or modifications of the product in a manner not recommended by the manufacturer; or any neglect, misuse or excessive use. The original Sales Docket or cash receipt must accompany warranty claims to provide starting date of the warranty period.

KIT WARRANTY Most kits are successfully constructed with few problems however, once the kit is under construction all warranty is void, as we cannot guarantee assembler's workmanship or components that have been used.

STATUTORY WARRANTIES Any statutory warranties applicable to your purchase will be honoured by Jaycar in addition to the warranties set out herein. If there is any conflict between any warranty herein contained and a statutory warranty, the terms of the statutory warranty will prevail.

FREIGHT CHARGES RELATING TO WARRANTY ITEMS Warranty repairs or replacement of goods is free of charge however freight charges to and from the service department is required to be paid by the customer.

REWARDS CLUB For a full list of terms & conditions go to www.jaycar.co.nz/member-access

ACCOUNT FACILITIES Jaycar is happy to provide account facilities for the following organisations:
• Schools (Government & non-Government), TAFE, Colleges and Universities
• State & Federal Government Depts, including research facilities
• Hospitals
• Mining companies
• TV & Radio Stations
• ALL public ('LTD') companies
ALL 'Pty Ltd' companies, Sole Traders or Partnerships must complete an account application form. Simply go online to apply https://jaycarnz.applyeasy.com.au/credit or write to 'Accounts Receivable', PO Box 12241, Penrose, Auckland 1642 New Zealand. If you are one of the above you can buy from us on a 30-day (strictly from invoice) account. The invoice will go with the goods or to your accounts payable office (you nominate). Non Payment of monies due will be cause to discontinue supply and to commence recovery procedures.

RECOVERY OF MONIES OWED In the event that Jaycar needs to recover monies owed then the full balance on the account becomes due and payable and all costs of recovering this money will be borne by the debtor.

TECHSTORE - MAIL ORDER & INTERNET PURCHASES For Mail Order & Internet Purchases special conditions apply:

Goods - Aerosols, flammable, heavy and bulky items cannot be sent by post.

Payment - via cheque, money order or credit card (MasterCard, Visa, American Express), & Pay Pal, Humm Online Only.

Minimum Order Value - Mail order purchases have a minimum order value of $10.

International Orders - Please remember you may have to pay customs and importing charges at your end (if applicable). We cannot supply full customs documentation, but all parcels include required customs dockets. Should you require to return goods for any reason from outside Australia it is essential that customs documentation is included. If customs dockets are not included it can be a costly exercise to have the goods cleared by Customs and the customer must pay this charge. Failure to include customs documentation may result in long delays. Note: Jaycar cannot accept any responsibility or liability for the suitability of any product for use outside Australia, nor its compliance with local regulations.

Freight - Various freight options and rates are given on the order form. After selecting the freight option that suits you, please clearly mark it and add these additional charges to the total on your order. Goods cannot be delivered to a PO box via road or air courier service.

Missing or Damaged Goods - At Jaycar, we've sent out hundreds of thousands of parcels via post over the last 30+ years and the number of items that have been genuinely lost is less than 0.001%. We've found road and air transportation equally as reliable. However it must be emphasised that our responsibility for the goods ceases when the goods are handed over to the nominated carrier. Risk on the goods passes to you when the goods leave our warehouse. Our order form allows you to elect to have goods insured against loss in transit at your cost otherwise loss of goods in transit is at your own risk. All claims for missing and damaged goods in transit must be lodged with the carrier or local Post Office. If goods have been insured please contact Jaycar.

Insurance - If you wish to insure, it will cost $1 for every $100 value or part thereof e.g. If your order is for $145 the insurance will be $2. This insurance covers goods DAMAGED in transit. We do not automatically issue insurance unless you specify. If you don't mention insurance you will NOT be insured.

Out of Stock Items - Are not automatically back ordered. Please re-order once item(s) are in stock.
